MICHIGAN SEAL OF BILITERACY	81
Academic Enrichment, Tutorial, and Miscellaneous Courses.....	82
HIGH SCHOOL FORMS	86

Dear Student(s),

Welcome to Universal Learning Academy, where learning is exciting! We have put together this course description handbook to help you decide and choose the right classes. The course abstracts will help you understand what each class has to offer. Some courses have prerequisites, be sure to pay attention to these requirements prior to your selection, your counselor or counselor advocate and or your principal can assist you if you have any questions. Remember, the best choices are made by students who carefully study this information, explore their career goals, and share their high school plans with their parents.

Mission

The mission of Universal Learning Academy is to provide its students with quality education that focuses on the Michigan core curriculum and international cultures, including the study of a language, culture, and history different from one’s own.

The Academy shall provide an education that will enable the various ethnic traditions, values, and experiences of students to enrich and nurture one another. Moreover, the Academy shall provide an education of the whole child by integrating the different aspects of children’s learning and lives so as to make them more meaningful.

The Academy will prepare its students to be independent lifelong learners and productive working members of a global society through acquired diverse knowledge, experiences and skills. The Academy shall provide an environment that encourages students to become upright responsible decision-makers, reflective of equity, respect and understanding, maximizing each individual’s intellectual, physical, psychological and moral self by utilizing a unique safe and orderly environment that is conducive to learning to meet the challenges of this ever-changing world.

Philosophy

Universal Learning Academy believes that...

- ☞ Quality education enhances the student's mental, physical, and emotional abilities and promotes altruistic thinking in this diverse and divided world.
- ☞ Quality education integrates teaching the ethnic and cultural traditions and values into the academic program and develops an awareness of their self, identity, and obligations towards self, family, community, society and the world.

- 👂 A successful school inspires the joy of learning.
- 👂 All students are capable of learning and can reach their potential if given the opportunity.
- 👂 Learning is an on-going life-long process.
- 👂 Successful learning requires active participation and involvement in the school by parents and the community.

Effective schools promote teaming, collaboration and shared decision-making among staff, students, and community.

The Four Pillars of HES and the Academy

Education at Hamadeh Educational Services and its academies is centered around FOUR PILLARS and instilling these values, ideals, and principles in ourselves and in our students. We—all students *and* staff of HES—believe in and strive to embody the following characteristics, habits, traits, and values...

I. Scholarship *(based on a commitment to life-long learning)*

- ✚ We are educated—familiar and informed regarding well-known concepts and ideas.
- ✚ We are inquisitive—questioning, examining, and exploring what we see/are presented with.
- ✚ We are intellectual—able to think things through, reason, and problem-solve.
- ✚ We are reflective—taking stock of how we’re progressing academically and making plans for ongoing improvement.

II. Character

(based on learning/acquiring habits and traits that will make one successful in all aspects of life, including being a leader/an example for others to follow, instilled with a sense of contribution and fulfillment)

- ✚ We have true grit.
 - We are self-motivated, driven, ambitious, and determined; we possess strong will power.
 - We are self-disciplined/self-controlled.
 - We are optimistic and confident.
 - We are tenacious, resilient, and able to persevere in the face of obstacles.
 - We understand that failure is an important and integral part of the road to success.
 - We possess a strong work ethic.
- ✚ We are honest, trustworthy, and principled.
- ✚ We are fair, moral, and ethical.
- ✚ We are respectful to ourselves, family, and all others.

- ✚ We have integrity and the strength/fortitude to stand up for our rights and what we believe in.
- ✚ We are reflective and accountable--able to admit when we are wrong, accept responsibility for our wrongdoings, and willing to learn from our mistakes.
 - We are forgiving and apologetic whenever necessary.
- ✚ We are appreciative and humble, instilled with a sense of modesty.
- ✚ We are willing, effective, and respectful communicators—even when we disagree with others or have others disagree with us.
- ✚ We are empathetic, caring, kind, understanding, and open-minded.
- ✚ We are balanced and successfully able to “juggle” the different roles of life.
- ✚ We are courageous, brave, and smart risk-takers.
- ✚ We are passionate and enthusiastic with a zest for life.
- ✚ And because we have strong character, we undoubtedly have a strong sense of contribution.
 - We are actively engaged and have a strong willingness to make a difference in the lives of others.
 - We desire to help others (based on our own intrinsic motivation to do so and a sense of responsibility to others).
 - We possess a sense of benevolence.
 - We have an innate sense of giving and generosity.

III. Culture

(based on a sense of respecting, honoring, understanding, and valuing the practices, ideas, an experiences shared by a common group—integral when building community)

- ✚ We realize just how crucial it is to know, understand, and appreciate our own culture.
- ✚ We know how vital culture is to all peoples and that we must seek to understand not only our own culture, but the culture of other peoples as well.
- ✚ We value, respect, and understand how the common experiences of a group/community help shape the way its members understand the world—that culture is a collective, agreed-upon set of familiar values, beliefs, perspectives, practices, products (e.g. books, foods, laws, dress, music, arts and crafts, games, etc.), and ideas that bind a group together in harmony.
- ✚ We appreciate and value how one’s culture influences one’s views, ideas, loyalties, perspectives, fears, hopes, and other characteristics.
- ✚ We understand and empathize with the concept that while all groups/cultures certainly have diverse and distinctive characteristics, all cultures are composed of human beings who ultimately share the same basic needs and want the same things in life: physical needs (food, water, etc.), safety and security, supporting relationships--specially family, a sense of accomplishment and realization of hopes and dreams, etc.

- ✚ We realize that each cultural group has unique strengths and perspectives that the larger community—the world—can benefit from.
- ✚ We are aware that understanding culture and cultural differences will help us all overcome and prevent division and misunderstandings (like racial and ethnic division, gender bias, stereotyping, etc.).
- ✚ We know that understanding and appreciating culture is a vital first step to building community.

IV. Community

(based on a sense of belonging and responsibility to others/all the diverse groups we are a part of—a sense and understanding that we are all brothers and sisters of the human race)

- ✚ We *know*—not just recognize—that while we must be aware of and learn from others different from us (capitalizing on the diversity of the world), we are *more* similar than different and are all brothers and sisters of the human race.
- ✚ We consistently and actively communicate with those around us—those in our various communities.
- ✚ We are responsible for more than just ourselves; we belong to, support, and are responsible/loyal to a great variety of groups/communities including:
 - One’s family (parents, siblings, immediate and extended family), neighbors, friends, teams, and school.
 - One’s affiliations/organizations/memberships, city/village/tribe, state, country, culture, species, environment, and the entire world.

Educational Program

The Academy offers a variety of educational programs that comply with the Michigan Core/Merit Curriculum Content and Common Core Standards recommended by the Michigan State Board of Education. Students will receive instruction in the following areas:

- | | |
|---|--------------------------------------|
| Career and Employability Skills (MISC) | Life and Physical Sciences |
| Computer and Information Sciences | Life Skills and Other Electives |
| Cornerstone/Study Skills | Mathematics |
| English Language and Literature (Reading/Writing) | Physical Health and Safety Education |
| Fine and Performing Arts | Social Sciences and History |
| Foreign Language and Literature | Standardized Assessment Skills |
| Violence Prevention/Character Education | |

Academy Grade Scale

Students enrolled in high school courses are subject to the following grading scale:

Overall Grade Interpretation

A	93-100 4.0	C	73-77 2.3
A-	90-92 3.7	C-	70-72 1.8
B+	88-89 3.5	D+	65-69 1.5
B	83-87 3.3	D	64-63 1.3
B-	80-82 2.8	F	0-62 0.0
C+	78-79 2.5	<i>*Any student taking an AP class will earn a +1.0 GPA point</i>	

Academy Overall Grade Make-Up

Students enrolled in high school course are subject to the following overall grade make-up:

Summative: (60%) these are based on assessments in direct alignment to state standards per course. Such assessments may include: end of unit test, projects, and/or performance.

Formative: (40%) these are based on homework (online or hardcopy) assignments, quizzes, exit tickets, projects, and/or performance.

Core Course/Credit Requirements

The minimum credit requirements have been revised and established as follows to help high school students plan their progression from one grade to another. The successful completion of the number of credits listed will be necessary before a student will be “passed” to the next grade in high school.

Michigan Merit Curriculum High School Graduation Requirements (18 credits)	
ENGLISH LANGUAGE ARTS (ELA) - 4 Credits	
Proficiency in State Content Standards for ELA (4 credits)	
MATHEMATICS - 4 Credits	
Proficiency in State Content Standards for Mathematics (3 credits) Proficiency in district approved 4 th mathematics credit options (1 credit) (Student must have a math experience in their final year of high school.)	
ONLINE LEARNING EXPERIENCE	
Course, Learning or Integrated Learning Experience	
PHYSICAL EDUCATION & HEALTH - 1 Credit	
Proficiency in State Content Standards for Physical Education and Health (1 credit); Or Proficiency with State Content Standards for Health (1/2 credit) and district approved extra-curricular activities involving physical activities (1/2 credit)	
SCIENCE - 3 Credits	
Proficiency in State Content Standards for Science (3 credits); Or beginning with the class of 2015: Proficiency in some State Content Standards for Science (2 credits) and completion of a department approved formal career and technical education program (1 credit)	
SOCIAL STUDIES - 3 Credits	
Proficiency in State Content Standards for Social Studies (3 credits)	
VISUAL, PERFORMING AND APPLIED ARTS - 1 Credit	
Proficiency in State Content Standards for Visual, Performing and Applied Arts (1 credit)	
WORLD LANGUAGE - 2 Credits (Effective beginning with students graduating in 2016)	
Formal coursework OR an equivalent learning experience in grades K-12 (2 credits); Or Formal coursework or an equivalent learning experience in grades (1 credit) and completion of a department approved formal career and technical education program or an additional visual, performing and applied arts credit (1 credit)	

High School Courses Taken for Credit

Graduation Requirements	Freshman	Sophomores	Juniors	Seniors
English Language Arts	4.00	4.00	4.00	4.00
Mathematics	4.00	4.00	4.00	4.00
Science	3.00	3.00	3.00	3.00
Social Studies/History	3.00	3.00	3.00	3.00
World Languages	2.00*	2.00*	2.00*	2.00*
Visual/Performing Arts	1.00	1.00	1.00	1.00
Physical Education/Health	1.00*	1.00	1.00	1.00
Electives	6.00	6.00**	6.00**	6.00**
Total MMC Credits	24.00	24.00	24.00	24.00
Technology/Online Learning	20 hours	20 hours	20 hours	20 hours
Community Service*	50 hours	50 hours	50 hours	50 hours

*Based on the MDE credit requirements students may use

Credit is not issued for Technology/Online Learning hours. Up to 1.00 electives credits may be issued for Community Service hours on an individual basis if all core credits have been met and a student is short on electives credit that would prevent a student from meeting 4-year graduation requirements. This must be approved by the high school Principal and Superintendent.

ACADEMY GRADUATION CHECKLIST GUIDE

GRADUATION REQUIREMENTS				
GRADE LEVEL		COURSE	EARNED	NOT EARNED
ENGLISH LANGUAGE ART (4 credits)				
ELA	9 th Grade	ELA I		
	10 th Grade	ELA II		
	11 th Grade	ELA III		
	12 th Grade	ELA IV		
MATHEMATICS (4 credits)				
MATH	9 th Grade	Algebra I		
	10 th Grade	Algebra II		
	11 th Grade	Geometry		
	12 th Grade	4 th Year Math Options: Business Math, Pre-Calculus, AP Calculus, College Algebra		
SCIENCE (3 credits)				
Science	9 th Grade	Biology		
	10 th Grade	Chemistry		
	11 th Grade	Physics		
	<i>*Anything else is an elective</i>			
SOCIAL STUDIES (3 credits)				
Social Studies	9 th Grade	U.S History		
	10 th Grade	Civics		
	10 th Grade	Economics		
	11 th Grade	World History		
	<i>* Anything else is an elective</i>			
WORLD LANGUAGE (2 credits)				
World Language (Arabic)	9-12 th Grade	Foreign language: *Formal coursework in grades K-12 (2 credits) or for coursework (1 credit) and additional visual/performing arts credit (1 credit)		
VISUAL PERFORMING ARTS (1 credit)				
Art	9-12 th Grade	Art and/or Music		
PHYSICAL EDUCATION (1 credit)				
PE	9-12 th Grades	PE/Health		
	9-12 th Grades	* Or - PE/Health (0.5 semester) and play a sport for one season		
ELECTIVES (6 credits)				
Electives	9-12 th Grades	**Any offered elective course of interest per student educational development plan (EDP)		
(50) HOURS COMMUNITY SERVICE HOURS				

MMC and Graduation Requirements

Students are expected to follow a course of study as outlined and updated in their Educational Development Plan (EDP) and in preparation for post-secondary education or career readiness as applicable to student's individual needs. Students are expected to complete their High School graduation requirements within 4 years of first time enrolling as a 9th grader in the State of Michigan. School Counselor(s) and School Principal are available to provide guidance and facilitate alternative options for earning credit through summer, online and night programs for students in need of remediation and make-up credit with approval through our credit recovery program. A student must be enrolled and in attendance during the final marking period prior to graduate at the Academy in order to receive the Academy's High School Diploma.

Credit Recovery

The credit recovery program is offered to students during semester I, II and summer school in a given school year. The courses supplement the existing curriculum and provide students an opportunity to earn high school credits in courses they did not pass during a given school year.

With approval from the school principal (see form in the section high school forms), students can independently take the course they need through Keystone, within a given semester or summer school. When completed, the student's work is evaluated by Keystone and a report is sent to the student's guidance counselor, who can assign a grade and award credit at their discretion.

Students are not permitted to take Keystone classes independently to advance their credits, graduate early, and/or skip classes that the Academy offers. Keystone is ONLY used for credit recovery.

The Academy will pay up to two credit recovery courses within a given school year. If students fail these course(s), they will need to reimburse the Academy for the class(es).

Michigan Merit Curriculum (MMC) High School Graduation Requirements

To prepare Michigan's students with the knowledge and skills needed for the jobs in the 21st Century, the State of Michigan has enacted a rigorous new set of statewide graduation requirements that are among the best in the nation. With these new graduation requirements, students will be well-prepared for future success in college and the workplace.

Michigan Merit High School Graduation Requirements are meant to ensure that Michigan's high school graduates have the necessary skills to succeed either in post-secondary education or in the workplace.

-  Awarding credit is based on proficiency in expectations, not seat time and can be earned prior to student entering high school or by testing-out (credit must be evaluated and approved by the Principal, and Superintendent);

- ✚ Credit may be earned through one or more of the following: alternative course work, humanities course sequences, career and technical education, industrial technology courses, or vocational education (credit must be evaluated and approved by the Principal, and Superintendent);
- ✚ Credit can be earned through advanced studies such as accelerated course placement, advanced placement, dual enrollment, or an early college/middle college program (credit must be evaluated and approved by Principal, and Superintendent);
- ✚ The Michigan Department of Education is required to develop subject area content expectations and subject area assessments to evaluate whether students have met those expectations; students are currently evaluated at no more than 25% of course grade in MDE defined Core classes using MDE created assessments, SAT (Scholastic Assessment Test): college admission exams on specific subjects and/or teacher created assessments aligned to Secondary Credit Assessment (SCA) requirements;
- ✚ Beginning with students entering 8th grade in 2006 (Class of 2011), schools must give 7th grade students the opportunity to create an educational development plan based on a career pathways program or similar career exploration program. All students must create a plan before entering high school and we currently use Career Cruising online.

Graduation/Honors Recognition Criteria **Valedictorian & Salutatorian**

The valedictorian designation shall be the student who has the highest cumulative grade point average in grades 9-12 and the salutatorian shall be the student with the next highest cumulative grade point average. Student must also meet all graduation requirements including compliance with all Academy policies, guidelines, and pillars.

Any disciplinary issue dealing with academic honesty and major discipline issues that involve Out of School Suspension days will automatically disqualify a student even if they are holding the highest GPA. At the Principal's and/or Superintendent's discretion, discipline concerns prior to the senior(s) year may be forgiven.

To qualify, a student must have been attending full time at the Academy for two consecutive school years at time of graduation. All grades earned in all subjects, both required and elective, shall count in determining the final average. In the instance of a tie, students will be awarded a designation as co-valedictorian or co-salutatorian.

More information can be found in the parent student handbook on page 57.

Top 10 Students

Our top 10 ranking students will lead the class during graduation and sit in the front. Rankings are based on final GPA's. If there is a tie for ranking 10 and 11, then both will join the Top 10.

Graduation Cords

Honors (Gold) Cord: Students must have a cumulative GPA of a 3.5-3.69.

High Honors (blue and gold) Cord: Students must have a 3.7-3.99.

Honors with Distinction (blue, gold, and white) Cord: Students must have a GPA of 4.0 or higher.

National Honor Society (NHS): In order to receive the following, you must have met the requirements of National Honor Society and be in good standing. (*requirements will be shared at the first NHS meeting*)

NHS Board Members: Wear the Blue NHS stole as well as the light blue cord.

NHS Members: Wear the Blue NHS stole

Student Government(SG): In order to receive the following, you must have met the requirements of Student Government and be in good standing. (*requirements will be share at the first student government meeting*)

SG Board Members: Wear the yellow sash with their elected positions shown on the front and a navy blue cord.

SG Members: Wear a navy blue cord.

Honor Awards

The President's Education Award: This award is given to our highly qualified students who have earned a cumulative GPA of 3.5 or higher throughout all 4 years of high school and a minimum cumulative SAT of 1100.

The Full-Ride Scholarship Award: The Full-Ride Scholarship Award is awarded to students who received a full-ride scholarship to the university of their choice. This scholarship covers the tuition of all four years. Students must be attending that university.

Advance Placement Award

AP Scholar Award: (3 or higher on 3 or more exams)

AP Scholar with Honors: (average score of 3.25 on ALL AP exams AND 3 or higher on 4 or more exams)

AP Scholar with Distinction: (average score of 3.50 on ALL AP exams and 3 or higher on 5 or more exams)

Scholarship & Raised at Universal Learning Academy Recognition

HES GALA Scholarship (Gold and Silver): Recipients of the Gold and Silver scholarship from the HES GALA are recognized.

Raised at Universal Learning: Students who attended Universal Learning Academy from Kindergarten through senior year. Students must have attended all years.

Million Dollar Club

The Million Dollar Club consists of students who raise a million dollars in scholarships on their own. Their names will be engraved in the million-dollar plaque and with given a million-dollar check. Students will be recognized during Honors Night.

MDE CORE COURSES

- 🎧 **English Language Arts:** Language Arts, English, Reading
- 🎧 **Social Studies:** Social Studies, Economics, Geography, History, Political Science, Genocide
- 🎧 **Science:** Science, Biology, Chemistry, Physics, Geology-Earth Science, Astronomy, Integrated Science, Physical Science
- 🎧 **Mathematics:** Mathematics
- 🎧 **World Language:** French, German, Greek, Latin, Russian, Spanish, Other World Languages, Italian, Polish, Hebrew, Japanese, Chinese, Arabic
- 🎧 **The Arts:** Music Education, Visual Art, Theatre/Performance, Dance
- 🎧 **Level-Related Assignments:** General Elementary, K-5 All Subjects, K-8 Self-Contained

MMC Personal Curriculum (PC) Process

The Personal Curriculum (PC) is an option any student or family can explore as a way to modify certain graduation requirements and earn a diploma. The purpose of secondary education is to prepare students for life after high school. Any modification to a student's graduation requirements needs to be consistent with this purpose. The high school diploma is documentation that the student has met the expectations and possesses the knowledge and skills necessary for post-secondary success. Students who are not pursuing a diploma or students who are unable to meet modified MMC requirements do not need a personal curriculum. The PC is a process to modify specific credit requirements and/or content expectations based on the individual learning needs of a student.

It is important to understand when it may be appropriate to use a personal curriculum (PC) option to modify the Michigan Merit Curriculum (MMC) requirements.

State statute allows personal curriculum modification in order to:

- 🛠️ Go beyond the academic credit requirements by adding more math, science, English language arts, or world languages credits.
- 🛠️ Modify the mathematics requirement.
- 🛠️ Modify, if necessary, the credit requirements of a student with an Individualized Education Plan (IEP).
- 🛠️ Modify credit requirements for a student who transfers from out of state or from a nonpublic school and is unable to meet the MMC requirements.

The personal curriculum option allows the board of a school district or public school academy to award a regular high school diploma providing the student completes the requirements of the PC, including as many of the content expectations of the MMC as practicable (MCL 380.1278 a) and allows several flexible learning options, including:

- 🛠️ For any student, earning additional credit in specific subject areas and counting these credits toward meeting the state requirements.

- ✚ For students challenged with meeting Algebra II expectations, adjusting mathematics requirements.
- ✚ For students with an IEP, allowing modifications of the MMC necessary to demonstrate proficiency.
- ✚ For students transferring to a district from out of state or from a nonpublic school, modifications of requirements under limited conditions.

A personal curriculum may be appropriate for a student who has demonstrated one or more of the following:

- ✚ The ability or desire to access advanced or specialized content that cannot be met through electives (e.g., district lacks the resources to provide the course/content, or schedule does not allow student to access district offering).
- ✚ The ability to succeed in accelerated or advanced math, science, English language arts, or world languages.
- ✚ The academic need to reduce the Algebra II credit requirement from 1.0 credit to 0.5 credits.

For a student with an IEP:

- ✚ A documented need to make modifications because of the student's disability affects access to and/or demonstration of proficiency in the curriculum.
- ✚ Lack of progress on the MMC despite documented interventions, supports, and accommodations.

For a transfer student:

- ✚ Transferring from out of state or from a nonpublic school after successful completion of the equivalence of two years of high school credit.

Prior to considering a personal curriculum modification as a course of action for any student, educators must make every effort to help the student meet the requirements of the MMC using what is commonly known as Response to Intervention (RtI) or varied and creative strategies such as:

- ✚ Integrated and differentiated instruction
- ✚ Interventions and support
- ✚ Spiraled curriculum
- ✚ Online learning
- ✚ Work-based learning
- ✚ Project-based learning
- ✚ Flexible scheduling
- ✚ Peer coaching
- ✚ Adult mentoring
- ✚ Electives
- ✚ College credit opportunities

While every request to modify a student's graduation requirements shall be considered, the Academy may deny a personal curriculum request if:

- ✚ The request does not comply with state statute.
- ✚ Other options for meeting the student's education needs have not been documented.
- ✚ It is not in the best interest of the student.
- ✚ The members of the PC development team cannot reach agreement.

Modifications should be made in such a way as to support meeting most or all of the content expectations where possible keeping in mind the following questions:

- ✚ How much high school content mastery is necessary to meet or exceed MME performance standards?
- ✚ What knowledge and skills are necessary to be considered "college ready" based on the SAT?
- ✚ How will modifying expectations affect early access to the Michigan Promise Scholarship?
- ✚ How much content is sufficient to ensure that the student is prepared for post-secondary success?

In addition to identifying content or credit modifications, the PC must:

- ✚ Align with the EDP, post-secondary goals, and the IEP.
- ✚ Establish measurable goals.
- ✚ Provide a method to evaluate whether the student meets the goals.
- ✚ Include quarterly communication of progress with parent(s).

There are no modifications to credit requirements allowed in the following areas (exceptions may apply for students with an IEP or transfer students):

- ✚ English language arts
- ✚ Science
- ✚ World languages
- ✚ Civics/Government
- ✚ Online learning experience

The personal curriculum (PC) process demands the involvement of many people and should be used only after other options, like the use of supports and research-based interventions have been exhausted. At the Academy, the PC process shall include the student, parent/legal guardian, counselor, school principal designee, school psychologist (if available for a student with an IEP), teacher(s) with content expertise, and District Superintendent.

Step 1: Parent, student, or school personnel requests a personal curriculum (PC). Request is reviewed to determine if modifications are consistent with state and district policy.

Step 2: The PC team meets and:

- ✚ Reviews the EDP, student information, performance data, supports and interventions already implemented, and decide whether to recommend a PC.

- ✚ Analyzes student needs and MMC content to determine appropriate modifications.
- ✚ Determines how much of MMC content is practicable.
- ✚ Develops measurable performance goals and evaluation standards aligned to the goals for student success.
- ✚ Provides a method for evaluating progress.
- ✚ Confirms alignment with EDP goals

Step 3: PC team writes agreement and gets sign-off from the Superintendent, parent, and student.

Step 4: PC is implemented.

Step 5: Parent monitors progress through quarterly communication with each teacher of modified curriculum area. If revisions are needed, PC team reconvenes and revises using same process.

Step 6: The board of local school district or public school academy may award a diploma to students completing all requirements of a PC.

The Personal Curriculum

A Tool for Modifying the Michigan Merit Curriculum

Michigan Merit Curriculum (MMC)

Subject Area Credit Requirements	Personal Curriculum (PC) Modifications (Sequence and delivery up to district)
4 English Language Arts (ELA) Credits <ul style="list-style-type: none"> 1 credit in 9th, 10th, 11th, and 12th grade All credits aligned to state content expectations 	<ul style="list-style-type: none"> ✓ No modification except for students with an Individualized Education Program (IEP) and for transfer students who have completed 2 years of high school
4 Mathematics Credits <ul style="list-style-type: none"> 3 credits aligned with the required state content expectations (i.e., Geometry, Algebra I, and Algebra II) 1 math or math-related credit (not required to be aligned with state content expectations) 1 math or math-related course required in the final year which could include any of the 4 credits described above or may be an additional district credit Note: Students may earn 2 math credits for Algebra II when the credit is earned over 2 years, or 1.5 credits over 1.5 years, without requesting a personal curriculum 	<ul style="list-style-type: none"> ✓ 1 credit of Algebra II may be modified to ½ credit Algebra II, statistics, or functions and data analysis ✓ Additional modifications allowed for students with an IEP and transfer students who have completed 2 years of high school
3 Science Credits <ul style="list-style-type: none"> 1 Biology credit 1 Chemistry or Physics credit 1 additional science credit All credits aligned to state content expectations 	<ul style="list-style-type: none"> ✓ No modification except for students with an IEP and transfer students who have completed 2 years of high school
3 Social Studies Credits <ul style="list-style-type: none"> ½ Civics credit ½ Economics credit 1 U.S. History and Geography credit 1 World History and Geography credit All credits aligned to state content expectations 	<ul style="list-style-type: none"> ✓ No modification of Civics ✓ Minimum of 2 social studies credits prior to modification ✓ 1 social studies credit (other than Civics) can be exchanged for an additional English language arts, math, science, or world languages credit ✓ Additional modifications allowed for students with an IEP and transfer students who have completed 2 years of high school
1 Physical Education and Health Credit <ul style="list-style-type: none"> Credit aligned to state guidelines 	<ul style="list-style-type: none"> ✓ Credit can be exchanged for an additional English language arts, math, science, or world languages credit ✓ Additional modifications allowed for students with an IEP and transfer students who have completed 2 years of high school
1 Visual, Performing, and Applied Arts Credit <ul style="list-style-type: none"> Credit aligned to state guidelines 	<ul style="list-style-type: none"> ✓ Credit can be exchanged for an additional English language arts, math, science, or world languages credit ✓ Additional modifications allowed for students with an IEP and transfer students who have completed 2 years of high school
2 World Languages Credits (Begins with Class of 2016) <ul style="list-style-type: none"> Credits earned in grades 9-12 or an equivalent learning experience in grades K-12 Credits aligned to state guidelines 	<ul style="list-style-type: none"> ✓ No modification except for students with an IEP and transfer students who have completed 2 years of high school
Online Learning Experience <ul style="list-style-type: none"> Online course, learning experience, or experience is incorporated into one or more required credits 	<ul style="list-style-type: none"> ✓ No modification except for students with an IEP and transfer students who have completed 2 years of high school

Subject Area Credit Requirements	Personal Curriculum (PC) Modifications (Sequence and delivery up to district; support courses can count for credit regardless of year)
4 English Language Arts (ELA) Credits <ul style="list-style-type: none"> • 1 credit in 9th, 10th, 11th, and 12th grade • All credits aligned to state content expectations 	<ul style="list-style-type: none"> ✓ No modification except for students with an Individualized Education Program (IEP) and for transfer students who have completed 2 years of high school
4 Mathematics Credits <ul style="list-style-type: none"> • 3 credits aligned with the required state content expectations (i.e., Geometry, Algebra I, and Algebra II) • 1 math or math-related credit (not required to be aligned with state content expectations) • 1 math or math-related credit required in the final year which could include any of the 4 credits described above or may be an additional district credit • Note: Students may earn 2 math credits for Algebra II when the credit is earned over 2 years without requesting a personal curriculum 	<ul style="list-style-type: none"> ✓ Completion of at least 1.5 credits aligned to math content expectations prior to any modification ✓ 1 credit of Algebra II may be modified to ½ credit ✓ Additional modifications allowed for students with an IEP and transfer students who have completed 2 years of high school
3 Science Credits <ul style="list-style-type: none"> • 1 Biology credit • 1 Chemistry or Physics credit • 1 additional science credit • All credits aligned to state content expectations 	<ul style="list-style-type: none"> ✓ No modification except for students with an IEP and transfer students who have completed 2 years of high school

Online Learning Experience <ul style="list-style-type: none"> • Online course, learning experience, or experience is incorporated into one or more required credits 	<ul style="list-style-type: none"> ✓ No modification except for students with an IEP and transfer students who have completed 2 years of high school

Dual Enrollment and Alternative Courses

The Postsecondary Enrollment Options Act, 1996 PA 160 (MCL 388.511-388.524), and the Career and Technical Preparations Act, 2000 PA 258 (ML 388.1901-388.1913), encourage and enable qualified pupils to enroll in courses or programs in eligible postsecondary institutions (state universities, community colleges, or independent nonprofit-degree-granting colleges or universities located within Michigan). This law, commonly referred to as Dual Enrollment, directs school districts to assist students in paying tuition and fees for courses at Michigan public or private colleges or universities. The conditions necessary to be met can be found in the High School Dual Enrollment Application Form on the next page and are aligned to MDE Pupil Accounting Manual requirements. Please review the contents of this notice with your parents. If you believe you are eligible for dual enrollment, qualify for tuition and fee support, and wish to participate, contact your counselor or school Principal.

High school credit may be granted to students who successfully complete a course of instruction offered by an eligible postsecondary institution. The following requirements apply to such courses of instruction:

1. Application and admission to the postsecondary institution are the responsibility of the student.
2. To receive high school credit for the successful completion of a postsecondary institution coursework, the student must obtain prior approval from the High School Counselor, Principal, Superintendent and District Office Authorization. Approval will be based upon the following factors:
 - Credit earned under this policy section shall be based on a “pass” grade.
 - Computation of high school credit for postsecondary institution coursework will be based on the following formula: 3 to 4 semester hours equals $\frac{1}{2}$ unit of high school credit.
 - Upon validation from the issuing postsecondary institution, the student’s credit and grade will be recorded on the student’s high school transcript. The grade earned by the student shall not be included for any purpose in the computation of the student’s grade point average or class ranks (pass or fail grades issued only).
 - The student is responsible to have the postsecondary institution report the student’s grade and credit to the High School Counselor and Principal in a timely fashion.
 - Tuition for the course(s) will be paid by the school district for eligible students only in accordance with the requirements of the Postsecondary Enrollment Options Act.

A student enrolled in a correspondence course may receive high school credit for work completed, provided:

1. The course is given by an institution accredited by the North Central Association of Colleges and Secondary Schools;

2. The student is a fourth or fifth year senior;
3. The student assumes responsibility for all fees; and
4. The building Principal and Superintendent approve the course in advance.

A maximum of 6 units of credit may be counted toward the requirements for a student's high school graduation. A student will receive high school credit for successfully completing: (1) any course given by an institution accredited by the North Central Association of Colleges and Secondary Schools, and (2) independent study in a curriculum area not offered by the District, provided the student obtains the consent of a supervising teacher as well as the building Principal.

Dual Enrollment

Course No/MI ID: Based on college CRN#

GRADES: 9-12

CREDIT TYPE: Miscellaneous

CREDIT(S): 0.5

Seminar courses vary widely, but typically offer a small peer group the opportunity to investigate areas of interest. Course objectives may include improvement of research and investigatory skills, presentation skills, interpersonal skills, group process skills, and problem-solving and critical-thinking skills. Seminars aimed at juniors and seniors often include a college and career exploration and planning component. This course is also used for students who are enrolled in dual enrollment courses at the college level.

Work-Based Experiences (WBLE), Apprenticeships, and Internships

Work-based learning experiences (WBLE), apprenticeships, and internships provide pupils with a planned program of job training and other employment experiences related to a chosen career. The Work-based learning experiences Program is a school-to-work program offering work-based courses on/off the premises of the Academy. The Program matches a student's class work and career interests and offers work-site based learning opportunities. The Work-based learning experiences Program is not a job placement service; it is an Enrollment Program, which enables students to receive career exploration, training and supervised work experience, while also continuing their academic studies.

The Work-based learning experiences is a full-year program designed primarily for high school seniors. Juniors are accepted into the program by recommendation of their counselor. Either one-half or one credit per year is granted for Work-Based depending upon the number of courses a student is enrolled in. Placement will be determined based on the student's Career Pathway as identified in his/her E.D.P. (Educational Development Plan).

The student's job duties are outlined in advance and performance and progress on his/her job will be supervised by the school designated certified teacher. Work Based students are approved to work between 5-10 hours per week, with a minimum requirement of 5 hours per week. Should a student's school work or performance on the job become unsatisfactory, removal from the Work Based program could result. The student's first obligation is to his/her school work.

The qualifications and requirements to be met can be found in the High School Work-Based Learning Application on the next page and aligned to the MDE Pupil Accounting Manual requirements.

Please contact your counselor or school principal, to discuss further and determine your eligibility. A student will receive high school credit after successfully completing the program (pass or fail grades will be issued only).

WBLE A/B/C

Course No/MI ID: 22998a/b/c

GRADES: 11-12

CREDIT TYPE: Miscellaneous

CREDIT(S): 0.5

WBLE courses are learning experiences coordinated by a school district through a training agreement providing an educational experience related to school instruction involving supervised work and monitored by a certified instructor employed by the district. Seminar courses vary widely, but typically offer a small peer group the opportunity to investigate areas of interest. Course objectives may include improvement of research and investigatory skills, presentation skills, interpersonal skills, group process skills, and problem-solving and critical-thinking skills. Seminars aimed at juniors and seniors often include a college and career exploration and planning component. This course is also used for students who are enrolled in dual enrollment courses at the college level.

**** Work-based learning experiences can be found in the “forms” section in the course offerings handbook (pg. 86).**

Virtual Learning, Distance Learning and Independent Study

Students have the opportunity to participate in additional learning experiences with School Principal and Superintendent’s approval to take courses defined as virtual learning, distance learning and/or independent study experiences. The courses must be academic in nature, local school board approved, and earning you credit towards MMC high school diploma or grade progression.

The Academy will partner with Michigan Virtual University or other approved entities to provide supplemental online courses and resources to expand opportunities for all students.

Courses may be offered at the Academy during the day as a scheduled class period with a certified teacher available in the classroom or through distance learning, through enrollment at a community college or university, or, the course may be offered at a self-scheduled time. An on-site certified teacher serving as a mentor, for assistance and evaluation, shall be assigned to the pupil by the Academy.

Types of courses are defined as follows:

- **Computer or internet courses provided at the school** during the school day as part of your class schedule, while you are in regular daily attendance. A certified teacher will be present in the classroom. The number of courses taken, through the computer or the internet, at the school with the certified teacher present are unlimited but require an application/approval process similar to dual enrollment process to ensure successful completion of a 4-year MMC high school diploma program.
- **Distance Learning** is provided via two-way communication between the teacher-of-record and a group of students over a television monitor. The period of instruction is part of your schedule during the regular school day. An adult shall be present in the classroom and opportunities are made available pending availability of cooperative arrangements among districts. The number of courses taken, through the two-way communication device, at the school with the certified teacher present are unlimited but require an application/approval process similar to dual enrollment process to ensure successful completion of a 4-year MMC high school diploma program.
- **Self-scheduled** virtual learning courses are taken at your self-scheduled time and place. The course will be a part of your class schedule with the teacher-of-record identified and you shall be concurrently enrolled in and attending at least one course offered by the district in which credit is earned and regular daily attendance is required. You shall be enrolled in the self-scheduled course and in attendance on the pupil membership count day or the supplemental count day during the class time designated for approved courses. You are limited to two self-scheduled courses, which require an application/approval process similar to dual enrollment process to ensure successful completion of a 4-year MMC high school diploma program.
- **Independent study** courses are a learning experience that is academic in nature providing you the opportunity for self-directed learning. This course shall appear on your schedule and teacher-of-record must be identified. You shall be concurrently enrolled in and attending at least one course offered by the district in which credit is earned and regular daily attendance is required. You shall be enrolled and in attendance on the pupil membership count day or the supplemental count day during the class time designated for approved courses. You are limited to two independent studies courses which require an application/approval process similar to dual enrollment process to ensure successful completion of a 4-year MMC high school diploma program.

Continuity of Learning Plan [Communicable Diseases]

High School (9-12th Grade)

In the event of a pandemic that forces schools to shut-down, the Academy will move to the online based platform previously used to continue the educational year remotely.

As done in previous years, the Academy will provide pupils with equitable access to technology and the internet necessary to participate in instruction (Chromebooks for All

students, Hotspots and Wi-Fi) Professional Development for Teachers to support Technology proficiency and Virtual Teaching Best Practices, Technology Updates to Platforms to support Interactive best practices , and tutorial videos and step by step guides to help parents/students readapt to virtual learning The Academy will also identify, address and support all other needs that come up throughout the remote learning process. All students will have access to grade-level/course instructional materials and text as needed to complete their work either remotely and/or hard copy format.

These tools include:

1. Technology Platforms: other technology platforms that students are more comfortable with: Classroom Dojo, Ed Modo, and or Remind. These tools are used for ongoing communication about lessons, engagement, and resources to promote learning.
2. Communication: using PowerSchool and district created Gmail accounts for staff and students, instructional information and support is being provided and communicated. For students who struggle with using technology as a means of learning, teachers are providing instructional packets instead. These packets are created and individualized for student's base upon written request to the teacher and or school principal.
3. High School Dual Enrollment: Our partnership with community colleges and university will continue for semester 2 as instruction and/or materials are being provided by virtually through Blackboard and or Canvas platform. The district will continue to pay for these courses and resources for students who have elected this as their learning platforms. Additionally, students are able to elect not to continue in these courses with no academic penalty
4. Social Media Sites: these sites are used within the district to provide ongoing communication to students and parents.
 - a. Remind (@ulapa)
 - b. Facebook (@ulawestland)
 - c. Instagram (@ulawestland)
 - d. Class Dojo

With the implementation of the online platform for remote learning the following will be taking place:

1. Teachers will be posting threaded discussions for students everyday to think and respond to. Assignment will also be given to students on a weekly basis that are in direct alignment to grade level state standards.
2. 'Live' sessions will be held on a weekly basis with students and the teacher. Times and dates to the live sessions will be shared with the classroom teacher
3. Students will also be receiving learning links to help support the lesson. These links include: Khan Academy (<https://www.khanacademy.org/>), IXL (<https://www.ixl.com/>), Reading A-Z (<https://www.readinga-z.com/>), Mystery Science (<https://mysteryscience.com/>), Math XI (<https://www.mathxl.com/>), and many others will be uploading pre-recorded videos of direct instruction.
4. Parents are highly encouraged to sit through a live session and or engage with their children on threaded discussions and or assignments given by classroom teachers.

5. New learning will focus on those concepts most important for the content area or course for the remainder of the year.
6. Teachers will be available for students and families when needed. We highly encourage email notifications so the classroom teacher can provide a date and time to meet virtually to answer questions and or provide additional support.
7. Technology support is available throughout the school day and beyond. When students are struggling with the Chromebook or have questions in relations to our online learning, questions are submitted to the technology department (via by the teacher on behalf of the student/parent).

ELL and Special Education Services

All students, including the specials population will be provided with Chromebooks and equal opportunities to have equal access as per their individualized plans and applicable laws and regulations.

During remote learning, the Academy will provide alternative modes of instruction for English Language Learners (ELL) and using multiple online resources to address the individualized needs. ESL teachers and interventionists will continue to facilitate English Language Development (ELD) sessions via online platforms. Paraprofessionals have been collaborating and will continue to work closely but virtually with teachers to provide additional layer of learning opportunities to students to accelerate their learning process with the guidance of the teachers.

Students with Individualized Educational Plans (IEPs) will also be provided with alternative and accommodated instruction that meets each students IEP goals. Using mixed learning platforms to match student needs (i.e. online, videos, and packets), the Academy will ensure that students with IEPs get the full level of support and services they need to be successful. Resource room teachers will ensure that every student with an IEP gets the one on one interaction and support needed. Paraeducators and paraprofessionals are supporting the delivery of instruction and provision of services in collaboration with resource room teachers and grade level content teachers. All services that are contracted through third party vendors to support occupational and physical therapy for students who are in need will continue to stay active but move to an online platform. Speech and language therapy will continue to take place with students remotely. School psychologists will continue to work with students via phone/online methods.

Social workers will be communicating with families and students either/or by phone, ClassDojo messages, email, and through online platforms to support them with any resources or social-emotional supports they may need during this time. Social workers will use an online platform, uploading lessons and activities, videos and links for students to work on and hold meetings virtually to review the lessons posted. Students with transition services are provided with the services remotely. Parents will be informed about all online meetings.

The priority is providing students and families with support. Making phone calls to student families and connecting families with resources to make sure their basic needs are being

met which is crucial at this time. Parent consent will be retrieved via phone to speak with the student via phone or virtually to do a check in or provide social-emotional support and build on their social skills during these strenuous times.

Remote Learning: Accountability

In the event the Academy moves to a remote learning platform, teachers and administrators will continue to monitor all students through a variety of ways to ensure all students have access and are continuing the educational learning from home, either remotely and or packet format. Despite moving to an online platform, ALL students will be held accountable for their work (formative, summative, live sessions) and earn their letter grade based on a 60/40 split (60% summative /40% formative).

Aside from formative and summative assessments, teachers will continuously monitor learning through the following ways:

1. Using the district's online platform, many reports on participation, posting, and submitting assignments can be generated on a daily or weekly basis for teachers and support staff to see the level of participation per student.
2. Daily and ongoing feedback will be provided to students by the teacher on their postings, assignments, and or projects students posted
3. PowerSchool, student data management system, will be used to track who has been participating and submitting in assignments.
4. Progress reports will be generated from PowerSchool and send remotely to students and parents through the district Gmail account
5. Parent Portal applications will be active for parents to continuously check in on their child(s) status in each of their classes.
6. In the fall 2020, Students will be assessed in the NWEA where applicable. We will use the assessment results to identify gaps and adjust instruction and tutorial support as part of the MTSS process to provide differentiated instruction based on individual student needs and the curriculum expectations.

For students with special needs, we will be following state guidelines to utilize best efforts to manage and monitor IEP goals. Resource room teachers and grade level teachers will be communicating with families who children have IEP's to keep an open dialogue and provide ongoing support to ensure each child is successful. ESL teachers (and paraprofessionals) will be working with teachers to support students and families who need language accommodations.

Academy Grade Scale

Students enrolled in high school courses are subject to the following grading scale:

Overall Grade Interpretation

A	93-100	C	73-77
----------	--------	----------	-------

	4.0		2.3
A-	90-92 3.7	C-	70-72 1.8
B+	88-89 3.5	D+	65-69 1.5
B	83-87 3.3	D	64-63 1.3
B-	80-82 2.8	F	0-62 0.0
C+	78-79 2.5	<i>*Any student taking an AP class will earn a +1.0 GPA point</i>	

Academy Overall Grade Make-Up

Students enrolled in high school course are subject to the following overall grade make-up:

Summative: (60%) these are based on assessments in direct alignment to state standards per course. Such assessments may include: end of unit test, projects, and/or performance.

Formative: (40%) these are based on homework (online or hardcopy) assignments, quizzes, exit tickets, projects, and/or performance.

Participation

Student participation is MANDATORY for all students. While the Academy understands the current pandemic situation, flexibility and patience is key to getting student engagement. For students who will not be participating with the online learning and or paper pencil learning the following will be taking place at the Academy to address this lack of participation:

1. Teachers will call home to ensure parents and students understand the requirements of their participation to ensure the students learns their grade level content standards so they can advance to the next grade level.
2. Administration team will be working with teachers on providing support by following up with parents and students to ensure they will be engaging within online/paper pencil learning by:
 - a. Utilizing social media and sending messages to all stakeholders about the requirements of online/paper pencil learning
 - b. Calling home to parents and students

- c. Sending written notices to the home (if needed and mailed) letting them know their lack of participation may affect their overall grade level content and they may not be ready to advance to the next grade level.
3. Teachers will be putting in '0' in gradebook for high school students who will not be participating with online learning which quickly alerts parents via text message generated in Parent Portal (parent gradebook view).

Technology, Computer and Information Science Departments

The MMC's Online Learning Experience Guidelines document¹ identifies the three manners in which a student in middle school through high school can have a meaningful online learning experience. From the guidelines we see that online learning is identified as "a structured learning activity that utilizes technology with intranet/Internet-based tools and resources as the delivery method for instruction, research, assessment, and communication." The three manners in which a student can have an online learning experience are Online Courses, Online Learning Experiences and Online Learning incorporated into each of the Required Credits.

Based on the guidelines, a quality online learning experience is a combination of structured, sustained, integrated, meaningful learning activities accessed via a telecommunications network. A student that has been successful in this type of experience should develop competency for being able to learn in a virtual environment (life-long learning). The total collection across all grades 6-12 of these experiences are required to be a minimum of 20 hours. Since Online Learning is incorporated into each of the Required Core Classes, students will not be required to submit learning experience logs. Instructional Staff will collaborate at the beginning of the school year to include specific activities in the course syllabus and planning documents so that one full year meets a minimum of 20 hours giving students the opportunity to accumulate 140+ hours of online learning experience.

Courses in computer and informational science departments can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction

- 👉 **WebQuests** – an inquiry-oriented activity in which most or all of the information used by students is online.
- 👉 **Educational Blog** – a personal online journal that is frequently updated and intended for

public consumption.

- 👉 **Wiki** – collaborative editing place on the web.
- 👉 **Podcast/Videocast** – the distribution of audio or video files over the Internet for listening on mobile devices and personal computers.
- 👉 **RSS Feed** – RSS stands for “Really Simple Syndication”. It is a way to easily distribute a list of headlines, update notices, and sometimes content to a wide number of people. It is used by computer programs that organize those headlines and notices for easy reading.
- 👉 **Learning Management System** – a software application or Web-based technology that provides a teacher a way to create and deliver content, monitor student progress and assess performance.
- 👉 **Online Research** – teacher directed and guided practical online searching that weeds out poor or non-relevant sites and directs students to sites easily recognizable as valid and trustworthy.
- 👉 **Electronic Portfolio** – a type of learning record that provides actual evidence of achievement – a collection of electronic documents that demonstrate your skills.

9-12.CI. Creativity and Innovation—By the end of grade 12 each student will:

9-12.CI.1. apply advanced software features (e.g. built-in thesaurus, templates, styles) to redesign the appearance of word processing documents, spreadsheets, and presentations

9-12.CI.2. create a web page (e.g., Dreamweaver, iGoogle, Kompozer)

9-12.CI.3. use a variety of media and formats to design, develop, publish, and present projects (e.g., newsletters, web sites, presentations, photo galleries)

9-12.CC. Communication and Collaboration—By the end of grade 12 each student will:

9-12.CC.1. identify various collaboration technologies and describe their use (e.g., desktop conferencing, webinar, listserv, blog, wiki)

9-12.CC.2. use available technologies (e.g., desktop conferencing, e-mail, videoconferencing, instant messaging) to communicate with others on a class assignment or project

9-12.CC.3. collaborate in content-related projects that integrate a variety of media (e.g., print, audio, video, graphic, simulations, and models)

9-12.CC.4. plan and implement a collaborative project using telecommunications tools (e.g., ePals, discussion boards, online groups, interactive web sites, videoconferencing)

9-12.CC.5. describe the potential risks and dangers associated with online communications

9-12.CC.6. use technology tools for managing and communicating personal information (e.g., finances, contact information, schedules, purchases, correspondence)

9-12.RI. Research and Information Literacy—By the end of grade 12 each student will:

9-12.RI.1. develop a plan to gather information using various research strategies (e.g., interviews, questionnaires, experiments, online surveys)

9-12.RI.2. identify, evaluate, and select appropriate online sources to answer content related questions

9-12.RI.3. demonstrate the ability to use library and online databases for accessing information (e.g., MEL, Proquest, Info-source, United Streaming)

9-12.RI.4. distinguish between fact, opinion, point of view, and inference

9-12.RI.5. evaluate information found in selected online sources on the basis of accuracy and validity

9-12.RI.6. evaluate resources for stereotyping, prejudice, and misrepresentation

9-12.RI.7. understand that using information from a single internet source might result in the reporting of erroneous facts and that multiple sources must always be researched

9-12.RI.8. research examples of inappropriate use of technologies and participate in related classroom activities (e.g., debates, reports, mock trials, presentations)

9-12.CT. Critical Thinking, Problem Solving, and Decision Making —By the end of grade 12 each student will:

9-12.CT.1. use digital resources (e.g., educational software, simulations, models) for problem solving and independent learning

9-12.CT.2. analyze the capabilities and limitations of digital resources and evaluate their potential to address personal, social, lifelong learning, and career needs

9-12.CT.3. devise a research question or hypothesis using information and communication technology resources, analyze the findings to make a decision based on the findings, and report the results

9-12.DC. Digital Citizenship—By the end of grade 12 each student will:

9-12.DC.1. identify legal and ethical issues related to the use of information and communication technologies (e.g., properly selecting and citing resources)

9-12.DC.2. discuss possible long-range effects of unethical uses of technology (e.g., virus spreading, file pirating, hacking) on cultures and society

9-12.DC.3. discuss and demonstrate proper netiquette in online communications

9-12.DC.4. identify ways that individuals can protect their technology systems from unethical or unscrupulous users

9-12.DC.5. create appropriate citations for resources when presenting research findings

9-12.DC.6. discuss and adhere to fair use policies and copyright guidelines

9-12.TC. Technology Operations and Concepts—By the end of grade 12 each student will:

9-12.TC.1. complete at least one online credit, or non-credit, course or online learning experience

9-12.TC.2. use an online tutorial and discuss the benefits and disadvantages of this method of learning

9-12.TC.3. explore career opportunities, especially those related to science, technology, engineering, and mathematics and identify their related technology skill requirements

9-12.TC.4. describe uses of various existing or emerging technology resources (e.g., podcasting, webcasting, videoconferencing, , online file sharing, global positioning software)

9-12.TC.5. identify an example of an assistive technology and describe its potential purpose and use

9-12.TC.6. participate in a virtual environment as a strategy to build 21st century learning skills

9-12.TC.7. assess and solve hardware and software problems by using online help or other user documentation

9-12.TC.8. explain the differences between freeware, shareware, open source, and commercial software

9-12.TC.9. participate in experiences associated with technology-related careers

9-12.TC.10. identify common graphic, audio, and video file formats (e.g., jpeg, gif, bmp, mpeg, wav, wmv, mp3, avi, pdf)

9-12.TC.11. understand and discuss how assistive technologies can benefit all individuals

9-12.TC.12. demonstrate how to import/export text, graphics, or audio files

9-12.TC.13. proofread and edit a document using an application's spelling and grammar checking functions

For additional information and resources relating to the 2009 METS-S, please visit: <http://www.techplan.org/METS>

Particular Topics in Computer Literacy**Course No/MI ID: 10008*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 9 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5**

An engaging and personalized learning environment designed to optimize teaching and learning through the interconnected use of mobile computing, audio, visual and formative assessment technologies across the curriculum.

Digital Media Technology**Course No/MI ID: 11151*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 9-12 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5**

These courses are designed to give students the skills necessary to support and enhance their learning about digital medial technology. Topics covered in the course may include internet research, copyright laws, web-publishing, use of digital imagery, electronic forums, newsgroups, mailing lists, presentation tools, and project planning.

Communication Technology**Course No/MI ID: 11002*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5**

Communication Technology courses enable students to effectively communicate ideas and information through experiences dealing with drafting, design, electronic communication, graphic arts, printing process, photography, telecommunications, and computers. Additional topics covered in the course include information storage and retrieval. Drafting equipment may be used to make scale drawings, including multi-view drawing, photographs, and poster mock-ups.

Publication Production**Course No/MI ID: 11104*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5**

Publication Production courses provide students with the knowledge and skills necessary to produce the school newspaper, yearbook, literary magazine, or other printed publication. Students may gain experience in several components (writing, editing, layout, production, and so on) or may focus on a single aspect while producing the publication.

Computer Applications**Course No/MI ID: 60004*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5**

This course is designed to bring students to a basic level of proficiency in applying computer technology in the educational setting. Emphasis will be placed on file management and appropriate technology use in a network environment. Students will be introduced to fundamental computer concepts, beginning keyboarding skills, word processing, multimedia presentations, Internet applications and spreadsheets. Special attention will be devoted to legal issues, copyright law, and safety. Application of technology in the workplace will be emphasized.

Business Communications

Course No/MI ID: 12009

VCO: Face to Face/Blended/Virtual Course

Grades: 10-12 CREDIT TYPE: CommunicationAudioVisualTechnology CREDIT(S): 0.5

This course will provide an introduction to business writing and speaking with a particular emphasis on grammar, sentence structure, thought formation, and presentation skills. Class activities will emphasize communication in real-world business situations and enable students to begin developing their ability to write and speak effectively in the workplace.

Life Management and Employability Department

Consumer Economics/Personal Finance 22210

Course No/MI ID:

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: Miscellaneous CREDIT(S): 0.5

Consumer Economics/Personal Finance courses provide students with an understanding of the concepts and principles involved in managing one's personal finances. Topics may include savings and investing, credit, insurance, taxes and social security, spending patterns and budget planning, contracts, and consumer protection. These courses may also provide an overview of the American economy.

Other Electives for 11-12th as outlined in the IES National Center for Education Statistics Secondary School Course Classification System SCED found online²:

- | | |
|--|---|
| 👉 Banking and Finance | 👉 Life Skills |
| 👉 Clothing/Sewing | 👉 Marketing Career Exploration |
| 👉 Community Living | 👉 Metal and Wood Processing/Production |
| 👉 Community Protection | 👉 Particular Topics in Child and Elder Care |
| 👉 Criminal Justice | 👉 Particular Topics in Law Enforcement |
| 👉 Energy/Power | 👉 Particular Topics in Reaction/Amusement/Attractions |
| 👉 Engineering Applications | 👉 Particular Topics in Travel and Tourism |
| 👉 Exploration of Electricity/Electronics | 👉 Personal Development |
| 👉 Family Living | 👉 Product Development |
| 👉 Food Service | 👉 Public Policy |
| 👉 Food and Nutrition | 👉 Robotics |
| 👉 Food Science | 👉 Self-Management |
| 👉 General Horticulture | 👉 Social Development Instruction |
| 👉 Health Care Occupations | 👉 Wildlife Management |
| 👉 Home Décor | |

Courses in life management and employability can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

Community Service

Community Service is defined as “sharing your gifts of time and talent to serve those who are in need of assistance.” It may involve interaction with individuals or groups, enabling you to share in the benefits of that experience, agency, organization, or business. Students have the opportunity to contribute to the social progress and cultural development of those in the community in general. **See page 70 for form.**

Requirements:

1. All high school students are required to complete and document 50 hours of community service in order to meet the graduation requirements of the Academy. Students are required to perform service as a non-paid volunteer experience at an agreed upon location, local agency, business or organization.
2. The student must make arrangements with the school counselor for approval of the agency or organization in which they plan to volunteer. The school counselor will assist those who need to find a community service site in which to volunteer. The school counselor will then issue the student a weekly time sheet where their volunteer time should be recorded for each week of community service completed. This time sheet is completed and submitted to the school counselor on a weekly basis during scheduled volunteer activities. The signatures of the student, community service site supervisor and the school counselor must be on the time sheet before the student can receive approved community service hours.
3. All students are required to keep a journal of the activities performed during their community service opportunities. *STUDENTS WILL NOT RECEIVE APPROVED COMMUNITY SERVICE HOURS WITHOUT A SUBMITTED JOURNAL.*

Evaluation:

1. The supervisor and student at the community service site will evaluate each student’s performance and the evaluation should be submitted to the school counselor upon completion of the community service opportunity.
2. Any evaluations not submitted to the school counselor will result in a delay in the student’s approved community service hours at the end of the school year.

Examples of Community Service Sites:

American Diabetes Association

Hospitals and/or Health Clinics

American Red Cross

Libraries

American Cancer Society

Motor City Makeover

Colleges and Universities
Galleries
Community Centers and/or Civil Rights Groups
Domestic Violence Shelters
Family Services Centers
Focus: HOPE
Food Banks/Distribution Centers
Girl and Boy Scouts
Homeless Shelters

Museums/Science Centers/Art
Neighborhood Centers
Public Parks and Camp Grounds
Salvation Army Schools
Schools and/or Day Cares
Senior Citizen/Nursing Homes
Sporting Facilities
Soup Kitchens

Physical Health and Safety Education Department

Fitness Test

The student must complete the following FitnessGram or the Brockport Physical Fitness Test (BPFT) items:

- 👉 Cardiovascular fitness (PACER)
- 👉 Muscular strength and endurance (Curl-up and Push-up)
- 👉 Flexibility (Back-Saver Sit-and-Reach)
- 👉 Body composition (Body Mass Index and Percent Body Fat)

Students must meet the criterion-referenced health-related fitness standards for age and gender for three of the four tests listed above.

Written Test

Score a minimum of 78% on a written test based on the rules, procedures, tactics, and information from selected activities that represent the three categories of physical activities (i.e., target, outdoor pursuits, target, rhythmic activities etc.) and fitness, including capacity to calculate target heart rate, explanation of the importance of monitoring heart rate during exercise, and the impact that it has on health and explanation of the principles of frequency, intensity, time, overload, progression, and specificity.

Skills Test

The student must demonstrate advanced skills and tactics in three activities from three categories, as well as basic skills and tactics in five additional activities. Students will be evaluated using the Task Analysis form of the skill. Assessment templates for use at the local level will be distributed by MDE.

Personal Fitness Plan

- 👉 Develop a personal fitness plan based on fitness assessment results.
- 👉 Monitor nutrition on MyPyramid.gov for one week, and create a report on the results.
- 👉 Complete MyPyramid worksheet.

Courses in physical health and safety education can be given face to face (in person/classroom),

blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

Physical Education

Course No/MI ID: 08001

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Physical Education courses provide students with knowledge, experience, and an opportunity to develop skills in more than one of the following sports or activities: team sports, individual/dual sports, recreational sports, and fitness/conditioning activities.

Fitness/Conditioning Activities

Course No/MI ID: 08005

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Fitness/Conditioning Activities courses emphasize conditioning activities that help develop muscular strength, flexibility, and cardiovascular fitness.

Recreation Sports

Course No/MI ID: 08004

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Recreation Sports courses provide students with knowledge, experience, and an opportunity to develop skills in more than one recreational sport or outdoor pursuit (such as adventure activities, croquet, Frisbee, wall climbing, bocce ball, fishing, hiking, cycling, and so on).

Health Education

Course No/MI ID: 08051

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Topics covered within Health Education courses may vary widely, but typically include personal health (nutrition, mental health and stress management, drug/alcohol abuse prevention, disease prevention, and first aid) and consumer health issues. The courses may also include grief studies of environmental health, personal development, and/or community resources.

Health Education - IS

Course No/MI ID: 08097

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Courses in Health Education—Independent Study, often conducted with instructors as mentors, enable students to explore topics of interest related to health and health education. Independent Study courses may provide students with opportunity to expand expertise in a particular application, to explore a topic of special interest in greater detail, or to develop more advanced skills.

Health and Fitness

Course No/MI ID: 08052

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Health and Fitness courses combine the topics of Health Education courses (nutrition, stress management, substance abuse prevention, disease prevention, first aid, and so on) with an active fitness component (typically including aerobic activity and fitness circuits) with the intention of conveying the importance of life-long wellness habits.

Weight Training

Course No/MI ID: 08009

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Weight Training courses help students develop knowledge and skills with free weights and universal stations while emphasizing safety and proper body positioning; they may include other components such as anatomy and conditioning.

Health and Life Management

Course No/MI ID: 08057

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Health and Life Management courses focus as much on consumer education topics (such as money management and evaluation of consumer information and advertising) as on personal health topics (such as nutrition, stress management, drug/alcohol abuse prevention, disease prevention, and first aid). Course objectives include helping students develop decision-making, communication, interpersonal, and coping skills and strategies.

Nutrition Science

Course No/MI ID: 19253

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Nutrition Science courses focus on the examination of individual nutrients; their structure and function in the human body; nutrient composition of food; and selection of food to meet nutrient needs, maintain health and provide satisfaction. Topics covered include digestion, absorption, and metabolism of carbohydrates, lipids, and proteins; vitamins and minerals; physical activity; nutritional needs throughout the life cycle; and evaluation of nutritional claims.

Team Sports

Course No/MI ID: 08002

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

Team Sports courses provide students with knowledge, experience, and an opportunity to develop skills in more than one team sport (such as volleyball, basketball, soccer, and so on). Other Electives for 11-12th as outlined in the IES National Center for Education Statistics

Secondary School Course Classification System SCED found online³:

Team Games

Course No/MI ID: PED012D

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation CREDIT(S): 0.5

The purpose of this course is to provide learning experiences that will lead to the development of basic skills in team games. An emphasis will be placed on the use of the game stages and movement framework as a guide for designing a variety of sport game experiences for students.

Basketball Tech

Course

No/MI

ID:08049

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: PhysicalHealthandSafetyEducation

CREDIT(S):0.5

The purpose of this course is to involve many basketball activities to help students improve in dribbling, shooting, defense, and teamwork. An emphasis will be place on the teaching students the essential skills of basketball so that students can participate effectively.

Fine and Performing Arts Department

Courses in fine and performing arts can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

Creative Art - Comprehensive

Course No/MI ID: 05154

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: FineandPerformingArts CREDIT(S): 0.5

Creative Art—Comprehensive courses provide students with the knowledge and opportunity to explore an art form and to create individual works of art. These courses may also provide a discussion and exploration of career opportunities in the art world. Initial courses cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are encouraged to develop their own artistic styles. Although Creative Art courses focus on creation, they may also include the study of major artists, art movements, and styles.

Creative Art - Drawing

Course No/MI ID: 05156

³ SCED: Secondary School Course Classification System: School Codes for the Exchange of Data:

<http://nces.ed.gov/pubs2007/2007341.pdf>

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: FineandPerformingArts** **CREDIT(S): 0.5**

Creative Art—Drawing courses cover the same topics as Creative Art—Drawing/Painting, but focus on drawing. In keeping with this attention on two-dimensional work, students typically work with several media (such as pen-and-ink, pencil, chalk, and so on), but some courses may focus on only one medium.

Creative Art - Drawing/Painting

Course No/MI ID: 05155

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: FineandPerformingArts** **CREDIT(S): 0.5**

Creative Art—Drawing/Painting courses cover the same topics as Creative Art—Comprehensive courses, but focus on drawing and painting. In keeping with this attention on two-dimensional work, students typically work with several media (such as pen-and-ink, pencil, chalk, watercolor, tempera, oils, acrylics, and so on), but some courses may focus on only one medium.

3-D Design

Course ID: 05159

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: FineandPerformingArts** **CREDIT(S): 0.5**

3-D Design is a course focused on the creation of three dimensional art for both artistic and functional purposes. In this studio course, students will learn three dimensional techniques, materials and tools and apply these skills to their own creative work. Students will become familiar with the principles and elements of design while completing a variety of assigned projects and experimenting with different media and processes. In addition to art production, students will be introduced to art history, art careers, and art criticism. 3-D Design classes will cover a wide array of 3-D projects such as relief sculpture, sculpture in the round, additive/subtractive sculpture, jewelry/wearable art, & commercial art. (must have previously earned .5 Art Credits (any art class)**)

Photography

Course No/MI ID: 05167

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: FineandPerformingArts** **CREDIT(S): 0.5**

Photography courses expose students to the materials, processes, and artistic techniques of taking artistic photographs. Students learn about the operation of a camera, composition, lighting techniques, depth of field, filters, camera angles, and film development. The course may cover black-and-white photography, color photography, or both. As students advance, the instruction regarding the creative process becomes more refined, and students are encouraged to develop their own artistic style. These courses may also cover major photographers, art movements, and styles.

Art Portfolio

Course No/MI ID: 05170

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: FineandPerformingArts** **CREDIT(S): 0.5**

Art Portfolio courses offer students the opportunity to create a professional body of work that

reflects their personal style and talent. Students are often encouraged to display their work publicly.

Art IS

Course No/MI ID: 05997

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Art Independent Study is a course designed to allow students to establish goals for individual growth and exploration of their own interests and style in their study of the visual arts. In addition to completing art projects, students are responsible for completing both written and reading assignments as well maintaining a process journal/ sketchbook. Students will be required to design and display their finished portfolio in the Fine Arts Showcase in the spring of each year.

AP Studio Art 2-D Design

Course No/MI ID: 00000

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 1.0

AP Studio Art emphasizes on making art as an ongoing process that involves the student in informed and critical decision making. This helps students develop technical skills and familiarize them with the function of the visual elements. The class encourages students to be creative and systematic investigation of formal and conceptual issues. Students will become independent thinkers who will contribute inventively and critically to their culture through artmaking.

Graphic Design

Course No/MI ID: 05162

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Graphic Design courses emphasize design elements and principles in the purposeful arrangement of images and text to communicate a message. They focus on creating art products such as advertisements, product designs, and identity symbols. Graphic Design courses may investigate the computer's influence on and role in creating contemporary designs and provide a cultural and historical study of master design works of different periods and styles.

Art Foundations

Course No/MI ID:

05199

VCO: Face to Face/Blended/Virtual Course

Grades: 9-12

Credit Type: FineandPerformingArts

Credits: 0.5

Art Foundations is a lively, inviting, comprehensive course written for beginning level artists. This course includes interactive activities and multicultural studio projects representing a wide variety of cultures, artistic styles and art media. This course is designed to enrich the lives of its participants through discovery and creative problem solving. It provides students with a broader perception of their environment and cultural perspectives

Art History

Course No/MI ID:

05152

VCO: Face to Face/Blended/Virtual Course

Grades: 9-12

Credit Type: FineandPerformingArts

Credits: 0.5

Art History courses introduce students to significant works of art, artists, and artistic movements that have shaped the art world and have influenced or reflected periods of history. These courses often emphasize the evolution of art forms, techniques, symbols, and themes.

Advertising Design

Course No/MI ID: 05163

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Advertising Design courses relate and apply creative expression and design principles to the field of advertising and commercial art. The courses offer practical experiences in generating original ideas, executing layouts, and preparing artwork for reproduction. Advertising Design courses may also provide a historical and contemporary view of art as students learn to critique work.

Beginning Band

Course No/MI ID: 05101

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

General Band courses develop students' technique for playing brass, woodwind, and percussion instruments and cover a variety of non-specified band literature styles (concert, marching, orchestral, and modern styles). Students learning how to play an instrument for the first time should enroll in this course.

Advanced Band

Course No/MI ID: 05102

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Courses in Concert Band are designed to promote students' technique for playing brass, woodwind, and percussion instruments and cover a variety of band literature styles, primarily for concert performances. Students who already know how to play an instrument and read music should enroll in this course. **Prerequisite:** General Band or Recommendation from Music Teacher

Instrumental Ensemble

Course No/MI ID: 00000

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Instrumental Ensemble courses are intended to further develop students' technique for playing brass, woodwind, percussion, and/or string instruments in small ensemble groups. Instrumental Ensemble courses cover one or more instrumental ensemble or band literature styles. Advanced music students should enroll in this course after recommendation from the music teacher or audition if recommendation is not available. **Prerequisite:** Audition or Recommendation from music teacher

Chorus I

Course No/MI ID: 05110

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Chorus I provides the opportunity to sing a variety of choral literature styles for men's and/or women's voices and is designed to develop beginning vocal techniques and the ability to sing parts. **Prerequisite: None**

Chorus II

Course No/MI ID: 05110b

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Chorus II provides the opportunity to sing a variety of choral literature styles for men's and/or women's voices and is designed to promote intermediate vocal techniques and the ability to sing parts. **Prerequisite: Chorus I**

Music History/Appreciation

Course No/MI ID: 05116

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Music History/Appreciation courses survey different musical styles and periods with the intent of increasing students' enjoyment of musical styles and/or developing their artistic or technical judgment. Music History/Appreciation courses may also focus on developing an understanding of a particular style or period.

Music Appreciation

Course No/MI ID: 05118

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Similar in nature to Music History/Appreciation courses, Music Appreciation courses focus specifically on students' appreciation of music. They are designed to help students explore the world of music and to develop an understanding of the importance of music in their lives.

Composition/Songwriting

Course No/MI ID: 05119

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: FineandPerformingArts

CREDIT(S): 0.5

Composition and Songwriting courses prepare students to express themselves through creating music. These courses may use conventional or nonconventional notation and may include harmonization in addition to melody writing. Along with musical instruments, students will also use computers for creating music.

- 👉 Theater Arts

Mathematics Department

Per MI Merit Curriculum (MMC) Course/Credit Requirements⁵, Mathematical understanding and skills are essential elements for meaningful participation in the global information society. US expectations in mathematics for high school students have not kept pace with expectations in high-achieving countries around the world. And, expectations about who can do mathematics in the US have led to inequitable and unacceptably low opportunities to learn for students living in poor and urban communities. In Michigan, the K-8 Mathematics Common Core Standards represent a major step forward in raising expectations in mathematics for all students. These high school expectations assume the ambitious foundation of the K-8 Common Core Standards and are intended to equip all students with a solid background for continued post-secondary study in any area, as well as with skills and knowledge essential for the workplace.

In addition to the high school expectations, The National Governors Association Center for Best Practices (NGA Center) and the Council of Chief State School Officers (CCSSO) released a set of state-led education standards, recently known as the Common Core State Standards. The mathematics standards for grades K-12 were developed in collaboration with a variety of stakeholders including content experts, states, teachers, school administrators and parents. The standards establish clear and consistent goals for learning that will prepare America's children for success in college and work.

The Common Core Standards define the knowledge and skills students should have within their K-12 education careers so that they will graduate high school fully prepared for college and careers.

The standards are aligned with college and work expectations:

- 👉 Clear, understandable and consistent;
- 👉 Include rigorous content and application of knowledge through high-order skills; build upon strengths and lessons of current state standards;
- 👉 Informed by other top performing countries, so that all students are prepared to succeed in our global economy and society; and
- 👉 Evidence and research-based.

⁵ Michigan Merit Curriculum – Mathematics http://www.michigan.gov/mde/0,4615,7-140-28753_38924_41644_42668---.00.html

It is essential to hold high expectations in mathematics for all students for completion of high school, whether they will enter the workforce or go on to post-secondary education.

As schools transition to the Common Core Standards, and realign their curriculum to such, both the Common Core Standards and High School Mathematics Standards will be carefully utilized to ensure appropriate instruction for high school students is taking place. The high school mathematics content expectations are organized in four strands: Quantitative Literacy and Logic, Algebra and Functions, Geometry and Trigonometry, and Statistics and Probability. The topics within each strand have been arranged to show mathematical growth and to illustrate mathematical trajectories of ideas that build on one another, when possible. There is a strong emphasis on mathematical reasoning throughout all of these strands. It is also important for high school students to become successful in applying mathematical concepts and processes to solve complex problems. Technological advances affect what is possible and necessary to learn in high school mathematics, and these expectations reflect this trend.

In alignment with recommendations from the National Research Council, 2001 “Adding it Up”, all students will complete a rigorous Mathematics curriculum in which they demonstrate proficiency in:

- ❖ Comprehension of mathematical concepts, operations and relations.
- ❖ Skill in carrying out procedures flexibly, accurately, efficiently, and appropriately.
- ❖ Ability to formulate, represent, and solve mathematical problems.
- ❖ Capacity for logical thought, reflection, explanation, and justification.
- ❖ Habitual inclination to see mathematics as sensible, useful, and worthwhile, coupled with a belief in diligence and one’s own efficacy.

The MI Common Core Standards in Mathematics for K-8⁶ prescribe a thorough treatment of number, including strong emphasis on computational fluency and understanding of number concepts, to be completed largely by the sixth grade. In high school, students peel away the contexts and study the language and thought patterns of formal mathematical reasoning. Connections and applications of number ideas and logic to other areas of mathematics, such as algebra, geometry, and statistics, are emphasized. Number representations and properties extend from the rational numbers into the real and complex numbers, as well as to other systems that students will encounter both in the workplace and in more advanced mathematics. The expectations for calculation, algorithms and estimation reflect important uses of number in a range of real-life situations. Ideas about measurement and precision tie closely to geometry. By learning logic and by constructing arguments and proofs, students will strengthen not only their knowledge and facility with mathematics, but also their ways of thinking in other areas of study and in their daily lives.

⁶ MI Common Core Standards for K-8 – Mathematics

○ http://www.michigan.gov/documents/mde/K-12_MI_Math_Standards_REV_470033_7_550413_7.pdf

The Standard 1 focus is on Quantitative Literacy and Logic in which students will:

- 👉 Based on their knowledge of the properties of arithmetic, understand and reason about numbers, number systems, and the relationships between them; represent quantitative relationships using mathematical symbols, and interpret relationships from those representations.
- 👉 Calculate fluently, estimate proficiently, and describe and use algorithms in appropriate situations (e.g., approximating solutions to equations); understand the basic ideas of iteration and algorithms.
- 👉 Understand mathematical reasoning as being grounded in logic and proof and can distinguish mathematical arguments from other types of arguments. Interpret arguments made about quantitative situations in the popular media; know the language and laws of logic and can apply them in both mathematical and everyday settings; write proofs using direct and indirect methods and use counterexamples appropriately to show that statements are false.

It is also recommended that students will:

- 👉 Read and interpret representations from various technological sources, such as contour or isobar diagrams.
- 👉 Understand the mathematical bases for the differences among voting procedures
- 👉 Compute sums of infinite geometric sequences.

In the middle grades, students see the progressive generalization of arithmetic to algebra. They learn symbolic manipulation skills and use them to solve equations. They study simple forms of elementary polynomial functions such as linear, quadratic, and power functions as represented by tables, graphs, symbols, and verbal descriptions. In high school, students continue to develop their “symbol sense” by examining expressions, equations and functions, and applying algebraic properties to solve equations. By the end of high school, their catalog of functions will encompass linear, quadratic, polynomial, rational, power, exponential, logarithmic, and trigonometric functions. The rich learning experience in Algebra will provide opportunities for students to understand both its structure and its applicability to solving real-world problems. Students will view Algebra as a tool for analyzing and describing mathematical relationships, and for modeling problems that come from the workplace, the sciences, technology, engineering, and mathematics.

The Standard 2 focus is on Algebra and Functions in which students will:

- 👉 Recognize, construct, interpret, and evaluate expressions; fluently transform symbolic expressions into equivalent forms; determine appropriate techniques for solving each type of equation, inequality, or system of equations, apply the techniques correctly to solve, justify the steps in the solutions, and draw conclusions from the solutions; know and apply common formulas.
- 👉 Understand functions, their representations, and their attributes; perform transformations, combine and compose functions, and find inverses; classify functions and know the characteristics of each family; work with functions with real coefficients

fluently; construct or select a function to model a real-world situation in order to solve applied problems; draw on their knowledge of families of functions to do so.

- 👉 Study the symbolic and graphical forms of each function family; recognize the unique characteristics of each family; use them as tools for solving problems or for modeling real-world situations.

It is also recommended that students will:

- 👉 Transform trigonometric expressions into equivalent forms using basic identities such as $\sin^2 \theta + \cos^2 \theta = 1$ and $\tan^2 \theta + 1 = \sec^2 \theta$.
- 👉 If a function has an inverse, find the expression(s) for the inverse.
- 👉 Write an expression for the composition of one function with another and recognize component functions when a function is a composition of other functions
- 👉 Know and interpret the function notation for inverses and verify that two functions are inverses using composition
- 👉 Use methods of linear programming to represent and solve simple real-life problems.

In grades K-5, students study figures such as triangles, rectangles, circles, rectangular solids, cylinders, and spheres. They examine similarities and differences between geometric shapes. They learn to quantify geometric figures by measuring and calculating lengths, angles, areas and volumes. In grades 6-8, students broaden their understanding of area and volume and develop the basic concepts of congruence, similarity, symmetry and the Pythagorean Theorem. They apply these ideas to solve geometric problems, including ones related to the real world.

In high school, students see geometry developed as a coherent, structure subject. They use the geometrical skills and ideas introduced earlier, such as congruence and similarity, to solve a wide variety of problems. There is an emphasis on the importance of clear language and on learning to construct geometric proofs. In this process, students build geometric intuition and facility at deductive reasoning. They use elements of logic and reasoning as described in the Quantitative Literacy and Logic strand, including both direct and indirect proof presented in narrative form. They begin to use new techniques, including transformations and trigonometry. They apply these ideas to solve complex problems about two- and three-dimensional figures, again including ones related to the real world. Their spatial visualization skills will be developed through the study of the relationship between two- and three-dimensional shapes.

The Standard 3 focus is on Geometry and Trigonometry in which students will:

- 👉 Represent basic geometric figures, polygons, and conic sections and apply their definitions and properties in solving problems and justifying arguments, including constructions and representations in the coordinate plane; represent three-dimensional figures, understand the concepts of volume and surface area, and use them to solve problems; know and apply properties of common three-dimensional figures.
- 👉 Students use and justify relationships between lines, angles, area and volume formulas, and 2- and 3-dimensional representations; solve problems and provide proofs about congruence and similarity.

- 👉 Solve problems about distance-preserving transformations and shape-preserving transformations; transformations will be described synthetically and, in simple cases, by analytic expressions in coordinates.

It is also recommended that students will:

- 👉 Understand the definition of a cyclic quadrilateral and know and use the basic properties of cyclic quadrilaterals.
- 👉 Know and use the relationship between the vertices and foci in an ellipse, the vertices and foci in a hyperbola, and the directrix and focus in a parabola, interpret these relationships in applied contexts.
- 👉 Find the image of a figure under the composition of dilation and an isometry.

In K-8, students develop the ability to read, analyze, and construct a repertoire of statistical graphs. Students also examine the fundamentals of experimental and theoretical probability in informal ways. The Basic Counting Principle and tree diagrams serve as tools to solve simple counting problems in these grades.

During high school, students continue to build on that foundation. They develop the data interpretation and decision-making skills that will serve them in their further study of mathematics as well as in their coursework in the physical, biological, and social sciences. Students learn important skills related to the collection, display, and interpretation of both univariate and bivariate data. They understand basic sampling methods and apply principles of effective data analysis and data presentation. These skills are also highly valuable outside of school, both in the workplace and in day-to-day life.

In probability, students utilize probability models to calculate probabilities and make decisions. The normal distribution and its properties are studied. Students then use their understanding of probability to make decisions, solve problems, and determine whether or not statements about probabilities of events are reasonable. Students use technology when appropriate, including spreadsheets. This strong background in statistics and probability will enable students to be savvy decision-makers and smart information-consumers and producers who have a full range of tools in order to make wise choices.

The Standard 4 focus is on Statistics and Probability in which students will:

- 👉 Plot and analyze univariate data by considering the shape of distributions and analyzing outliers; they find and interpret commonly-used measures of center and variation; and they explain and use properties of the normal distribution.
- 👉 Plot and interpret bivariate data by constructing scatter plots, recognizing linear and nonlinear patterns, and interpreting correlation coefficients; fit and interpret regression models, using technology as appropriate.
- 👉 Understand and apply sampling and various sampling methods, examine surveys and experiments, identify bias in methods of conducting surveys, and learn strategies to minimize bias; understand basic principles of good experimental design.

- ✦ Understand probability and find probabilities in various situations, including those involving compound events, using diagrams, tables, geometric models and counting strategies; apply the concepts of probability to make decisions.

It is also recommended that students will:

- ✦ Design simple experiments or investigations to collect data to answer questions of interest; interpret and present results.
- ✦ Understand methods of sampling, including random sampling, stratified sampling, and convenience sampling, and be able to determine, in context, the advantages and disadvantages of each.
- ✦ Explain the importance of randomization, double-blind protocols, replication, and the placebo effect in designing experiments and interpreting the results of studies.
- ✦ Explain the basic ideas of statistical process control, including recording data from a process over time.

Students must successfully complete prior classes with a final marking period average of 63% or above in order to proceed to the next course. Details for specific standards covered per section are outlined in the course syllabus by each teacher and shared with students when they enroll and attend the required courses.

Courses in mathematics can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction

Algebra I/VCO

Course No/MI ID: 02052

VCO: Face to Face/Blended/Virtual Course

GRADES: 9

CREDIT TYPE: Mathematics

CREDIT(S): 1

Algebra I courses include the study of properties and operations of the real number system; evaluating rational algebraic expressions; solving and graphing first degree equations and inequalities; translating word problems into equations; operations with and factoring of polynomials; and solving simple quadratic equations. This course may offer sections of Virtual Course Offering (VCO).

Algebra II/VCO

Course No/MI ID: 02056

VCO: Face to Face/Blended/Virtual Course

GRADES: 10

CREDIT TYPE: Mathematics

CREDIT(S): 1

Algebra II course topics typically include field properties and theorems; set theory; operations with rational and irrational expressions; factoring of rational expressions; in-depth study of linear equations and inequalities; quadratic equations; solving systems of linear and quadratic

equations; graphing of constant, linear, and quadratic equations; properties of higher degree equations; and operations with rational and irrational exponents. This course may offer sections of Virtual Course Offering (VCO).

College Algebra/VCO

Course No/MI ID: 02069

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 1

College algebra courses review and extend algebraic concepts for students who have already taken Algebra II. Course topics include (but are not limited to) operations with rational and irrational expressions, factoring of rational expressions, linear equations and inequalities, quadratic equations, solving systems of linear and quadratic equations, properties of higher degree equations, and operations with rational and irrational exponents. The courses may introduce topics in discrete math, elementary probability and statistics; matrices and determinants; and sequences and series. This course may offer sections of Virtual Offering (VCO).

Geometry/VCO

Course No/MI ID: 02072

VCO: Face to Face/Blended/Virtual Course

GRADES: 11

CREDIT TYPE: Mathematics

CREDIT(S): 1

Geometry courses, emphasizing an abstract, formal approach to the study of geometry, typically include topics such as properties of plane and solid figures; deductive methods of reasoning and use of logic; geometry as an axiomatic system including the study of postulates, theorems, and formal proofs; concepts of congruence, similarity, parallelism, perpendicularity, and proportion; and rules of angle measurement in triangles. This course may offer sections of Virtual Course Offering (VCO).

Discrete Mathematics/VCO

Course No/MI ID: 02102

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Discrete Mathematics courses include the study of topics such as number theory, discrete probability, set theory, symbolic logic, Boolean algebra, combinatorics, recursion, basic algebraic structures and graph theory. This course may offer sections of Virtual Course Offering (VCO).

Pre-Calculus/VCO

Course No/MI ID: 02110

VCO: Face to Face/Blended/Virtual Course

GRADES: 12

CREDIT TYPE: Mathematics

CREDIT(S): 1

Pre-Calculus courses combine the study of Trigonometry, Elementary Functions, Analytic Geometry, and Math Analysis topics as preparation for calculus. Topics typically include the study of complex numbers; polynomial, logarithmic, exponential, rational, right trigonometric, and circular functions, and their relations, inverses and graphs; trigonometric identities and equations; solutions of right and oblique triangles; vectors; the polar coordinate system; conic sections; Boolean algebra and symbolic logic; mathematical induction; matrix algebra; sequences and series; and limits and continuity. This course may offer sections of Virtual Course Offering

(VCO).

AP Calculus AB/VCO

Course No/MI ID: 02124

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: Mathematics

CREDIT(S): 1

Following the College Board's suggested curriculum designed to parallel college-level calculus courses, AP Calculus AB provides students with an intuitive understanding of the concepts of calculus and experience with its methods and applications. These courses introduce calculus and include the following topics: elementary functions; properties of functions and their graphs; limits and continuity; differential calculus (including definition of the derivative, derivative formulas, theorems about derivatives, geometric applications, optimization problems, and rate-of-change problems); and integral calculus (including antiderivatives and the definite integral). This course may offer sections of Virtual Course Offering (VCO).

Mathematics - Test Prep

Course No/MI ID: 02993

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Mathematics—Test Preparation courses provide students with activities in analytical thinking and with the skills and strategies associated with standardized test taking (such as the PSAT and SAT). Topics covered include strategies for arithmetic, algebra, geometry, and quantitative comparison problems as well as time management, scoring procedures and calculator usage.

Technical Math

Course No/MI ID: 02153

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Technical Math courses extend students' proficiency in mathematics, and often apply these skills to technical and/or industrial situations and problems. Technical Math topics may include but are not limited to rational numbers, systems of measurements, tolerances, numerical languages, geometry, algebra, statistics, and using tables, graphs, charts, and other data displays. Technology is integrated as appropriate.

Mathematics Proficiency Development 02994

Course No/MI ID:

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Mathematics Proficiency Development courses are designed to assist students in acquiring the skills necessary to pass proficiency examinations.

Consumer Math

Course No/MI ID: 02157

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Consumer Math courses reinforce general math topics (such as arithmetic using rational numbers, measurement, ratio and proportion, and basic statistics) and apply these skills to

consumer problems and situations. Applications typically include budgeting, taxation, credit, banking services, insurance, buying and selling products and services, home and/or car ownership and rental, managing personal income, and investment.

Business Math

Course No/MI ID: 02154

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Business Math courses reinforce general math skills, emphasize speed and accuracy in computations, and use these skills in a variety of business applications. Business Math courses reinforce general math topics (e.g., arithmetic, measurement, statistics, ratio and proportion, exponents, formulas, and simple equations) by applying these skills to business problems and situations; applications might include wages, hourly rates, payroll deductions, sales, receipts, accounts payable and receivable, financial reports, discounts, and interest.

Probability and Statistics

Course No/MI ID: 02201

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Probability and Statistics courses introduce the study of likely events and the analysis, interpretation, and presentation of quantitative data. Course topics generally include basic probability and statistics: discrete probability theory, odds and probabilities, probability trees, populations and samples, frequency tables, measures of central tendency, and presentation of data (including graphs). Course topics may also include normal distribution and measures of variability.

Mathematics - IS

Course No/MI ID: 02997

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

Mathematics—Independent Study courses, often conducted with instructors as mentors, enable students to explore topics of interest related to mathematics. Independent Study courses may serve as an opportunity for students to expand their expertise in a particular application, to explore a topic in greater detail, or to develop more advanced skills.

Occupationally Applied Math

Course No/MI ID: 02152

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Mathematics

CREDIT(S): 0.5

The structure of this class is intended to accommodate students who have had difficulty with the traditional math classroom. The course material is designed to prepare students continuing on to vocation and technical training and/or develop and refine job-related mathematics skills. The emphasis of this course is to understand and apply functional mathematics to solve problems in real world settings. Students will study the topics of estimation, measurement skills, geometry, simple statistics, and algebraic formulas to solve problems.

English Language and Literature Department

Per MI Merit Curriculum (MMC) Course/Credit Requirements⁷, the English Language and Literature Standards are built upon the expectation that students will engage in broad reading and writing experiences to encompass literary texts, nonfiction literary texts, and other informational texts. In addition to the English Language and Literature Standards and English High School Content Expectations, The National Governors Association Center for Best Practices (NGA Center) and the Council of Chief State School Officers (CCSSO) released a set of state-led education standards, recently known as the Common Core State Standards. The English Language and Literature standards for grades K-12 were developed in collaboration with a variety of stakeholders including content experts, states, teachers, school administrators and parents. The standards establish clear and consistent goals for learning that will prepare America's children for success in college and work.

The Common Core Standards define the knowledge and skills students should have within their K-12 education careers so that they will graduate high school fully prepared for college and careers. The standards are aligned with college and work expectations;

- 👉 Clear, understandable and consistent;
- 👉 Include rigorous content and application of knowledge through high-order skills; Build upon strengths and lessons of current state standards;
- 👉 Informed by other top performing countries, so that all students are prepared to succeed in our global economy and society; and
- 👉 Evidence and research-based.

As schools transition to the Common Core Standards, and realign their curriculum to such, both the Common Core Standards and High School English Language and Literature Standards will be carefully utilized to ensure appropriate instruction for high school students is taking place.

The High School Content Expectations incorporate a new emphasis on informational text comprehension and workplace reading and writing skills. They are organized into four strands, 14 standards, and 91 expectations. The skills and content addressed in these expectations will, in practice, be woven together into a coherent, integrated English language and Literature curriculum. The language and Literature processes are recursive* and reinforcing; students learn by engaging in and reflecting on these processes at increasingly complex levels over time.

Students will develop effective communication and literacy skills through rigorous and relevant units of instruction and engaging learning experiences by focusing on four key dispositions:

- 👉 Inter-Relationships and Self-Reliance
- 👉 Critical Response and Stance
- 👉 Transformational Thinking

⁷ Michigan Merit Curriculum – English Language Arts http://www.michigan.gov/mde/0,4615,7-140-28753_38924_41644_42674---.00.html

👉 Leadership Qualities

Teacher-created thematic units are designed to meet all of the English Language and Literature High School Content Expectations (HSCEs) allowing students to make connections that lead to mastery of the four dispositions. The units utilize what text offers for meeting the expectations including opportunities for direct instruction of text characteristics and features, reading and writing strategies, critical thinking, building of historical background knowledge, and On-Going Literacy development including vocabulary and grammar.

The Unit framework includes:

- 👉 Themes, Dispositions and Essential Questions
- 👉 Literacy Genre Focus/Anchor Texts, Linking Texts
- 👉 Literary Analysis and Genre Study
- 👉 Reading, Listening, Viewing Strategies and Activities
- 👉 Writing, Speaking, Expressing Strategies and Activities
- 👉 On-Going Literacy Development

The 9th Grade Focus is on Inter-Relationships and Self-Reliance in which students will learn to answer the following questions:

- 👉 Who am I?
- 👉 How do my skills and talents help to define me?
- 👉 How do I relate to my family, my community, and society?
- 👉 How do I build networks of people to support me?
- 👉 How am I a reflection of my relationships?
- 👉 How do my relationships within and across groups affect others?
- 👉 What influence do class, religion, language, and culture have on my relationships and my decisions?
- 👉 What can I contribute as an individual?
- 👉 What is my responsibility to society?
- 👉 How do I see my beliefs reflected in government policies and by politicians?

The 10th Grade Focus is on Critical Response and Stance in which students will learn to answer the following questions:

- 👉 How can I discover the truth about others?
- 👉 What sacrifices will I make for the truth?
- 👉 What criteria do I use to judge my values?
- 👉 How will I stand up for what I value?

- 👉 What can I do to realize and act on my dreams or visions for the future?
- 👉 How do I handle others' points of view?
- 👉 What role does empathy play in how I treat others?
- 👉 What power do I have as an individual to make positive change?
- 👉 How do I respond to improper use of power?
- 👉 How do I determine when taking social action is appropriate?
- 👉 What voice do I use to be heard?

The 11th Grade Focus is on Transformational Thinking in which students will learn to answer the following questions:

- 👉 How can forward thinking help me make better decisions?
- 👉 How do I develop a realistic plan for the future?
- 👉 What evidence do I have that I am committed to learning?
- 👉 How do I build a context for change in my life?
- 👉 When is loyalty to myself more important than loyalty to a friend?
- 👉 How will I know when to risk failure for possible success?
- 👉 How do I demonstrate that I am open-minded enough to learn from my experiences?
- 👉 How can I generate new ideas for solving problems?
- 👉 How can I invent new opportunities?
- 👉 What are the tradeoffs for technological advances?
- 👉 Which decisions I make today will affect me for my entire life?
- 👉 Where will I find wisdom?

The 12th Grade Focus is on Leadership Qualities in which students learn to answer the following questions:

- 👉 How do I know if I am developing the academic skills that I will need in my future life?
- 👉 What rules or principles do I use for how I treat others?
- 👉 What responsibility do I have to society?
- 👉 How do I resolve my responsibilities to myself with those to my family members, my school, community, and world?
- 👉 How can I effectively articulate my opinions and perspectives?
- 👉 Who is in a position to help me affect change?
- 👉 What can I do to avoid repeating mistakes made in history?
- 👉 What leadership skills have I developed?
- 👉 What leadership qualities will I need to take with me from high school?
- 👉 What qualities define a good world citizen?
- 👉 How can I contribute to creating the world I want to live in?
- 👉 How can I use my talents to create new opportunities for myself and others?

In alignment with recommendations from High Schools That Work and the SAT’s “The Official SAT Study Guide”, all students will complete a rigorous English Language and Literature curriculum in which they:

- 📖 Read 8-10 books and demonstrate understanding
- 📖 Write short papers (1-3 pages) weekly that are scored with a rubric
- 📖 1 formal essay per unit
- 📖 Write a major research paper annually
- 📖 Speak or present 3 to 5 times per year
- 📖 Discuss or debate topics monthly
- 📖 Take and organize notes weekly
- 📖 Maintain a portfolio of personal reading and writing

Students must successfully complete prior classes with a final marking period average of 63% or above in order to proceed to the next course. Details for specific standards covered per section and thematic units developed are outlined in the course syllabus by each teacher and shared with students when they enroll and attend the required courses. Students may take English Electives that qualify to meet English 12 Merit Curriculum Requirements.

Courses in English language arts can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

English/Language Arts I/VCO **Course No/MI ID: 01001**

VCO: Face to Face/Blended/Virtual Course

GRADES: 9 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 1**

English/Language Arts I (9th grade) is designed to get students thinking through the means of English. It emphasizes reading of a variety of genres, in addition to full essay writing, with critical thinking, analysis and evaluation of texts. With this course, students are exposed to a diverse group of themes to explore international concepts/ideas. Such collaborative class discussions, formative and summative assessments will further empower students to think creatively, express themselves, and become more aware of world cultures, reflecting their own cultures and those of others. This course may offer sections of Virtual Course Offering (VCO).

English/Language Arts II/VCO **Course No/MI ID: 01002**

VCO: Face to Face/Blended/Virtual Course

GRADES: 10 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 1**

English/Language Arts II (10th grade) is designed to further expand upon students’ higher level

order thinking skills addressing reading comprehension, analysis of text, written expression, speaking and listening skills. Students will be exposed to a variety of genres to include fiction and nonfiction texts, in addition to several novels within the school year. Socratic seminar and Fish Bowl activities will further support students to take leadership opportunities in the classroom. This course may offer sections of Virtual Course Offering (VCO).

English/Language Arts III/VCO

Course No/MI ID: 01003

VCO: Face to Face/Blended/Virtual Course

GRADES: 11

CREDIT TYPE: EnglishLanguageLiterature

CREDIT(S): 1

English/Language Arts III (11th grade) courses continue to develop students' writing skills, emphasizing clear, logical writing patterns, word choice, and usage, as students write essays and begin to learn the techniques of writing research papers. Students continue to read works of literature, which often form the backbone of the writing assignments. Literary conventions and stylistic devices may receive greater emphasis than in previous courses. This course may offer sections of Virtual Course Offering (VCO).

English/Language Arts IV/VCO

Course No/MI ID: 01004

VCO: Face to Face/Blended/Virtual Course

GRADES: 12

CREDIT TYPE: EnglishLanguageLiterature

CREDIT(S): 1

English/Language Arts IV (12th grade) courses blend composition and literature into a cohesive whole as students write critical and comparative analyses of selected literature, continuing to develop their language arts skills. Typically, students primarily write multi-paragraph essays, but they may also write one or more major research papers. This course may offer sections of Virtual Course Offering (VCO).

English Proficiency Development

Course No/MI ID: 01992

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: EnglishLanguageLiterature

CREDIT(S): 0.5

English Proficiency Development courses are designed to assist students in acquiring the skills necessary to pass proficiency examinations.

AP English Literature and Composition

Course No/MI ID: 01006

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: EnglishLanguageLiterature

CREDIT(S): 1

Following the College Board's suggested curriculum designed to parallel college-level English courses, AP English Literature and Composition courses enable students to develop critical standards for evaluating literature. Students study the language, character, action, and theme in works of recognized literary merit; enrich their understanding of connotation, metaphor, irony, syntax, and tone; and write compositions of their own (including literary analysis, exposition, argument, narrative, and creative writing).

AP English Language and Composition**Course No/MI ID: 01006b*****VCO: Face to Face/Blended/Virtual Course*****Grades: 11-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 1**

This course is designed to provide high school students the opportunity to engage in a typical introductory-level college English curriculum. The AP English Language and Composition course focuses on rhetorical analysis of nonfiction texts and the development and revision of well-reasoned, evidence-centered analytic and argumentative writing. Students choosing AP English Language and Composition should be interested in studying and writing various kinds of analytic or persuasive essays.

English - Test Prep**Course No/MI ID: 01203*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 9-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

English—Test preparation courses provide students with activities in analytical thinking and with the skills and strategies associated with standardized test taking. Topics covered include vocabulary, reading comprehension, and writing strategies, as well as time management, scoring procedures, and dealing with stress. Course materials may include the SAT and PSAT review materials, current assessment software programs, and previous standardized examinations.

Research/Technical Writing**Course No/MI ID: 01105*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

Research/Technical Writing classes prepare students to write research papers and/or technical reports. These classes emphasize researching (primary and secondary sources), organizing (material, thoughts, and arguments), and writing in a persuasive or technical style.

Applied English and Communications**Course No/MI ID: 01156*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

Applied English and Communications courses teach students communication skills—reading, writing, listening, speaking—concentrating on “real-world” applications. These courses usually emphasize the practical application of communication as a business tool—using technical reports and manuals, business letters, resumes, and applications as examples—rather than emphasize language arts skills as applied to scholarly and literary materials.

Literature of a Theme**Course No/MI ID: 01065*****VCO: Face to Face/Blended/Virtual Course*****GRADES: 10-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

These courses have the same aim as general literature courses (to improve students’ language arts and critical-thinking skills), but use selected literature to explore a particular theme as expressed from several points of view. Such themes might include The American Dream, Society and Self, Exploration, War and Peace, and the like.

Literature of an Author**Course No/MI ID: 01060*****VCO: Face to Face/Blended/Virtual Course*****Grades: 9-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

These courses have the same aim as general literature courses (to improve students' language arts and critical-thinking skills), focusing on a particular author and his or her work. Students determine the underlying assumptions and values within the selected works; compare techniques, styles, and themes of the author; and reflect upon the time period in which the author lived. Oral discussion is an integral part of literature courses, and written compositions are often required.

Literature of a Genre**Course No/MI ID: 01061*****VCO: Face to Face/Blended/Virtual Course*****Grades: 9-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

These courses have the same aim as general literature courses (to improve students' language arts and critical-thinking skills), focusing on one or several genres, such as poetry, essay, biography, short story, drama, and so on. Students determine the underlying assumptions and values within the selected works and also examine the structure, techniques, and intentions of the genre being studied. Oral discussion is an integral part of these genre-oriented courses, and written compositions are often required.

Literature of a Period**Course No/MI ID: 01062*****VCO: Face to Face/Blended/Virtual Course*****Grades: 9-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

These courses have the same aim as general literature courses (to improve students' language arts and critical-thinking skills), focusing on the literature written during or reflecting a particular time period (such as the French Revolution, the 1960s, or the 20th century). Students determine the underlying assumptions and values within the selected works, reflect upon the influence of societal events and social attitudes, and compare the points of view of various authors. Oral discussion is an integral part of literature courses, and written compositions are often required.

Literature of a People**Course No/MI ID: 01064*****VCO: Face to Face/Blended/Virtual Course*****Grades: 9-12****CREDIT TYPE: EnglishLanguageLiterature****CREDIT(S): 0.5**

These courses have the same aim as general literature courses (to improve students' language arts and critical-thinking skills), but use literature written by authors who share a particular characteristic such as culture or gender. Students determine the underlying assumptions and values within the selected works, reflect upon the influence of a common characteristic, and compare the points of view of various authors. Oral discussion is an integral part of literature courses, and written compositions are often required.

Creative Writing**Course No/MI ID: 01104*****VCO: Face to Face/Blended/Virtual Course***

GRADES: 10-12 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 0.5**

Creative Writing course offers students with the opportunity to develop and improve their technique and individual style in poetry, short story, drama, essays, and other forms of prose. The emphasis of the courses is on writing; however, students may study exemplary representations and authors to obtain a fuller appreciation of the form and craft. Although most creative writing classes cover several expressive forms, others concentrate exclusively on one particular form (such as poetry or playwriting).

English IS

Course No/MI ID: 01997

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 0.5**

This course seeks to support and enhance students' test-taking skills. The targeted skills practice and period full-length practice tests will prepare students for the SAT English and Reading portion of the exam, as well as the Work Keys Reading for Information test.

Exploration in Drama

Course No/MI ID: 05054

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 0.5**

Students will analyze the physical, emotional, and social dimensions of characters found in dramatic texts from various styles and media. Students will create characters consistent with a variety of styles, including classical, contemporary, and realistic/non-realistic dramatic texts in informal/formal theatre, film, television, or electronic media productions.

Public Speaking

Course No/MI ID: 01151

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: EnglishLanguageLiterature** **CREDIT(S): 0.5**

This course will enable students, through practice, to develop communication skills that can be used in a variety of speaking situations (such as small and large group discussions, delivery of lectures or speeches in front of audiences, and so on). Course topics may include (but are not limited to) research and organization, writing for verbal delivery, stylistic choices, visual and presentation skills, analysis and critique, and development of self-confidence.

Yearbook

Course No/MI ID:

12051

VCO: Face to Face/Blended/Virtual Course

Grades: 9-12 **Credit Type: EnglishLanguageArts** **Credits: 0.5**

Yearbook courses provide students with the knowledge and skills necessary to produce the school newspaper, yearbook, literary magazine, or other printed publication. Students may gain experience in several components (writing, editing, layout, production, and so on) or may focus on a single aspect while producing the publication.

Particular Topics in Journalism and Broadcasting

Course No/MI ID: 61105

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: EnglishLanguageLiterature CREDIT(S): 0.5

This course will address such topics as: First Amendment Rights, with a focus on freedom of the press, as they apply to written communication; the basics of writing objective news stories; journalistic law; and the history of journalism.

Journalism

Course No/MI ID: 61101

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: EnglishLanguageLiterature CREDIT(S): 0.5

This course will address such topics as: basic writing skills in various journalistic styles and formats with an emphasis on the idea of writing for one’s target reader and adjusting language usage accordingly. Specific topics of focus would target: grammar, spelling, punctuation, and Associated Press style. This would prepare students for advanced level journalism classes as well as writing as a career and within other career fields.

Other Electives for 11-12th as outlined in the IES National Center for Education Statistics Secondary School Course Classification System SCED found online⁸:

- 👉 Communications
- 👉 Forensic Speech – Debate
- 👉 Literature of an Arthur (Shakespeare)
- 👉 Literature of a Place
- 👉 Literature of a People (Arab American)
- 👉 Literature of a People (African American)

Life and Physical Science Department

Per MI Merit Curriculum (MMC) Course/Credit Requirements⁹, Science defines useful and connected knowledge at four levels: prerequisite, essential, core and recommended. The Life and Physical Sciences expectations are organized into Disciplines, Standards, Content Standards and Specific Performance Expectations. Essential expectations are defined and organized by discipline: Earth Science, Biology, Physics, and Chemistry. Essential content knowledge and performance expectations are required for graduation and are assessable on the Michigan Merit Exam (MME) and can also be assessed with formative assessments. Students who have useful and connected knowledge should be able to apply knowledge in new situations; to solve problems by generating new ideas; to make connections among what they read and hear in class, the world around them, and the future; and through their work, to develop leadership qualities while still in high school. In particular, high school graduates with useful and connected knowledge are able to engage in four key practices of science literacy. Overall course goals are organized in Bookmarks for students to use as checklists.

⁸ SCED: Secondary School Course Classification System: School Codes for the Exchange of Data:

<http://nces.ed.gov/pubs2007/2007341.pdf>

⁹ http://www.michigan.gov/documents/mde/K-12_Science_Performance_Expectations_v5_496901_7.pdf

The first key practice is to be able to communicate accurately and effectively Identifying Life and Physical Sciences Principles as follows:

- 👉 Describe, measure, or classify observations.
- 👉 State or recognize correct science principles.
- 👉 Demonstrate relationships among closely related science principles.
- 👉 Demonstrate relationships among different representations of principles.

The second key practice is to be able to communicate accurately and effectively Using Science Principles as follows:

- 👉 Explain observations of phenomena.
- 👉 Predict observations of phenomena.
- 👉 Suggest examples of observations that illustrate a science principle.
- 👉 Propose, analyze, and evaluate alternative explanations or predictions.

The third key practice is to be able to communicate accurately and effectively Scientific Inquiry as follows:

- 👉 Generate new questions that can be investigated in the laboratory or field.
- 👉 Critique aspects of scientific investigations.
- 👉 Conduct scientific investigations using appropriate tools and techniques.
- 👉 Identify patterns in data; relate patterns to theoretical models.
- 👉 Describe a reason for a given conclusion using evidence from an investigation.
- 👉 Explain how scientific evidence supports or refutes claims or explanations of phenomena.
- 👉 Design and conduct a scientific investigation with a hypothesis, several controlled variables, and one manipulated variable; gather data and organize the results in graphs, tables and/or other charts.

The fourth key practice is to be able to communicate accurately and effectively Reflection and Social Implications as follows:

- 👉 Critique whether questions can be answered through scientific investigations.
- 👉 Identify and critique arguments based on scientific evidence.
- 👉 Use appropriate scientific knowledge in social arguments, recognizing their limitations.
- 👉 Gather, synthesize, and evaluate information from multiple sources.
- 👉 Discuss scientific topics in groups, make presentations, summarize what others have said, ask for clarification, take alternative perspectives, and defend a position.
- 👉 Evaluate the future career and occupational prospects of science fields.
- 👉 Explain why a claim or a conclusion is flawed.
- 👉 Critique solutions to problems, given criteria and scientific constraints.

- 👉 Identify scientific tradeoffs in design decisions and choose among alternative solutions.
- 👉 Apply science principles or scientific data to anticipate effects of technological design decisions.

Universal Learning Academy has adopted the newly released K-12 Michigan Science Standards that were adopted in November 2015 by the state. Design teams working in four domains- life sciences, physical sciences, earth and space sciences, and engineering and technology. Research suggests students need to be engaged in doing science by engaging the same practices used by scientists and engineers.

Furthermore, students should engage in science and engineering practices in the context of core ideas that become ever more sophisticated as students move through school. Students also need to see the connections of these disciplinary-based core ideas to the bigger science concepts that cross disciplinary lines.

Cross Cutting Concepts (CCC)

The seven Crosscutting Concepts outlined by the *Framework for K-12 Science Education* are the overarching and enduring understandings that provide an organizational framework under which students can connect the core ideas from the various disciplines into a “cumulative, coherent, and usable understanding of science and engineering” (*Framework*, pg. 83).

These crosscutting concepts are...

1. Patterns
2. Cause and Effect
3. Scale, Proportion, and Quantity
4. Systems and System Models
5. Energy and Matter in Systems
6. Structure and Function
7. Stability and Change of Systems

Disciplinary Core Ideas (DCI)

The crosscutting concepts cross disciplines. However, within each discipline are core ideas that are developed across grade spans, increasing in sophistication and depth of understanding. Each performance expectation (PE) is coded to a DCI. A list of DCIs and their codes can be found on the MDE website and in the MDE Guidance Documents.

Science and Engineering Practices

In addition to the Crosscutting Concepts and Disciplinary Core Ideas, the National Research Council has outlined 8 practices for K-12 science classrooms that describe ways students should be engaged in the classroom as a reflection of the practices of actual scientists and engineers.

When students “do” science, the learning of the content becomes more meaningful. Lessons should be carefully designed so that students have opportunities to not only learn the essential science content, but to practice being a scientist or engineer. These opportunities set the stage for students to transition to college or directly into STEM careers.

Listed below are the Science and Engineering Practices from the *Framework*:

1. Asking questions and defining problems
 2. Developing and using models
 3. Planning and carrying out investigations
 4. Analyzing and interpreting data
 5. Using mathematics and computational thinking
 6. Constructing explanations and designing solutions
 7. Engaging in argument from evidence
- Obtaining, evaluating, and communicating information

Developing Michigan's New K-12 Science Standards

Michigan became a lead state in the development of the Next Generation Science Standards in 2011. Michigan was one of 26 lead states involved, with over 60 Michigan educators and scientists participating as lead developers or reviewers. Many college and university professors, teacher educators, business and industry professionals, district and ISD leaders, and classroom teachers became involved in the process, representing several organizations that will eventually support implementation of the standards.

CROSS-CUTTING CONCEPTS

Patterns	Physical Science	Earth Science	Life Science
Cause and Effect			
Scale, Proportion, and Quantity			
Systems and System Models			
Energy and Matter			
Structure and Function			
Stability and Change			
Engineering and Design			
Cross-disciplinary Integration			
Mathematics and Language Arts			

Based upon the Framework, the new standards are really a set of student performance expectations. These performance expectations incorporate three main elements:

- Disciplinary Core Ideas (science specific concepts in the life, earth, and physical sciences),
- Science and Engineering Practices (the practices of engaging in scientific investigation to answer questions, and engineering design to solve problems),
- Cross-Cutting Concepts (conceptual ideas common to all areas of science).

These expectations are also interwoven across disciplines, including connections to language arts and mathematics.

Implementing the Standards

Upon adoption of new standards, the real challenge of implementing the standards throughout Michigan's educational system begins. Parts of this are already in development,

including professional development from organizations like the Michigan Science Teachers Association and the Michigan Mathematics and Science Center Network. These efforts need to happen with a variety of stakeholders to develop a new support structure to address school district and higher education systems to engage in continuous improvement.

The Michigan Department of Education is working with the State Board of Education to ensure that our legislature and the education community at large understand the benefits and challenges of implementation of these new standards. Next steps, upon legislative review and adoption, include initial stages of an implementation plan, including communication to all stakeholders, identification of instructional and systems exemplars, and development of Michigan-specific guidance for how to incorporate Michigan examples of science and engineering content into classroom instruction for all students.

For additional information, contact Stephen Best (BestS1@michigan.gov).

Earth Science Bookmark

Processes and Materials of the Geosphere

- Infer geologic events using features and dating techniques.
- Relate geologic features to plate tectonics.
- Describe evolution of scientific consensus and current questions being researched.*

Hydrogeology

- Compare ground and surface water systems.
- Evaluate sustainability of aquifers related to land use decisions.
- Design and conduct an investigation on a the local watershed.*
- Evaluate solutions and careers in hydrogeology.*

Atmosphere and Severe Weather

- Analyze variables to predict severe weather.
- Propose plans to reduce risk of severe weather.*
- Evaluate the uncertainties that limit forecasting precision.*

Oceans, Climate and Climate Change

- Explain the mechanisms that control climate.
- Explain historical climate change.
- Analyze changes in CO₂ and temperature.
- Analyze the assumptions and variables of climate change models.*
- Distinguish observations, hypotheses, laws, and theories in climate change research.*

Understanding Earth Systems Science

- Analyze the interactions of four earth-spheres as they relate to coral reef degradation.
- Track the movement of heat energy through the four spheres using a climatic scenario.
- Explain the Gulf of Mexico dead zone using biogeochemical principles.
- Evaluate the societal trade offs of various renewable and non-renewable resources.*

Astronomy

- Describe the physical nature and history of our galaxy and the universe.
- Describe evidence about galaxy and universe.
- Explain stellar processes of stars.
- Describe how discoveries in astronomy changed societal perspectives.*

*Inquiry, Reflection, and Social Implications.

v.10.06

Biology Bookmark

Nature of Science / Science Inquiry

- Generate new questions.
- Evaluate scientific conclusions.
- Use models to predict results of inquiry.
- Conduct and design scientific investigations.

Organization of Living Systems

- All organisms are composed of cells .
- Multicellular organisms have cells specialized to carry out specific functions.
- Energy and matter transformations are required to supply cells with basic needs.
- Cells are composed of biomolecules – carbohydrates, fats, proteins and nucleic acids.
- Complex processes provide a stable internal environment through homeostasis.

Interdependence of Living Systems and the Environment

- Photosynthesis and cellular respiration are basic processes that support life.
- Ecosystems are supported by both biotic and abiotic factors.
- Matter is cycled in ecosystems (water, carbon, oxygen and nitrogen).
- Ecosystem stability results from biodiversity.
- Populations fluctuate as organisms interact with other species and the environment.
- Humans have tremendous impact on the environment.

Genetics

- Inherited traits result from genes that are passed from parent to offspring.
- Nucleic acids are biomolecules that contain protein assembly information.
- Cell division results in new cells for an organism as well as genetic information for offspring.
- Genetic variation is essential to biodiversity and population stability.

Evolution and Biodiversity

- Evolution provides a scientific explanation for the history of life on Earth.
- Molecular evidence supports kinship between species.
- Natural selection is the process that results in evolution.

v.10.06

Chemistry Bookmark

Matter and Change

- Describe states of matter with phase diagrams and in terms of motion and arrangement of molecules.
- Distinguish between chemical and physical changes in terms of properties of substances.

Atomic Structure

- Identify the number of sub-atomic particles in an ion or isotope and write the symbol as ${}^A_Z X$.
- Describe the location of electrons in terms of energy levels and orbitals.
- Use strong force and mass defect to explain nuclear stability and determine age using the ratio of different isotopes of an element.
- Use periodic table to write electron configurations and predict trends of atomic properties.

Moles

- Calculate percent weight of each element of the molecular formula of a compound.
- Identify limiting reagents in a reaction.

Compounds

- Predict types of bonds formed between two atoms as primarily ionic or covalent.
- Name and write formulae of simple ionic and molecular compounds; draw Lewis structures.
- Calculate empirical and molecular formula of a compound.

Reactions and Energy

- Balance chemical reactions and calculate the mass of reactants used, the mass of products made, or the ΔH .
- Explain how the rate of a chemical reaction is dependent on temperature and activation energy.
- Describe and predict equilibrium shifts in reactions caused by changing conditions.
- Balance half reactions and describe them as oxidation or reduction.

States of Matter

- Explain energy changes associated with changes in the state of matter.
- Explain changes in gas pressure, temperature, and volume in terms of the kinetic molecular theory.

Solutions

- Calculate concentration of solutes and explain how solutes affect properties of the solution.
- Classify solutions as acidic or basic, calculate pH, and predict products of an acid-base neutralization.
- Predict if a reaction is spontaneous.

Carbon

- Draw structural formulas for up to 10 carbon chains of simple hydrocarbons and draw their isomers.

v.10.06

Physics Bookmark

Motion

- Analyze and predict position, time, velocity, and acceleration using graphs, motion diagrams and different frames of reference.
- Describe, classify and solve problems that involve circular, projectile, or periodic motion.

Forces

- Analyze the effects of inertia and resistance forces such as air resistance and friction and their effects on acceleration.
- Solve problems involving force, mass, acceleration, and Newton's law of gravitation.

Momentum & Impulse

- Apply the law of conservation of momentum to analyze the motions of systems of objects.
- Solve problems involving momentum and impulse including simple collisions.

Mechanical Energy

- Solve problems involving work, PE, KE and the law of conservation of energy.
- Apply the law of conservation of energy to analyze the motions of systems of objects.

Electricity & Electromagnetism

- Explain how objects are charged in terms of conduction and induction and charge distribution.
- Use electrostatic attraction and repulsion to explain common experiences with charged objects, electrostatic forces and electric current.
- Analyze series and parallel electric circuits in terms of electric current, resistance, voltage, and power.
- Use magnetic repulsion and attraction to explain common experiences with magnets and magnetic objects.
- Relate magnetic fields and forces with electric current such as in the workings of motors and generators.

Waves

- Understand and solve problems involving frequency, wavelength, and wave speed including examples of light and sound.
- Describe and predict how waves and wave motion change due to interference with other waves and their surroundings.

Thermal

- Analyze the effects of heat, temperature, and efficiency in thermal systems.

Nuclear

- Understand nuclear fission and fusion and the interchangeable nature of mass and energy.

v.10.06

Students must successfully complete prior classes with a final marking period average of 63% or above in order to proceed to the next level of the course. Details for specific standards covered per section are outlined in the course syllabus by each teacher and shared with students when they enroll and attend the required courses.

Courses in life and physical science can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

Biology/VCO

Course No/MI ID: 03051

VCO: Face to Face/Blended/Virtual Course

GRADES: 9

CREDIT TYPE: Life and Physical Sciences

CREDIT(S): 1

Biology courses are designed to provide information regarding the fundamental concepts of life and life processes. These courses include (but are not restricted to) such topics as cell structure and function, general plant and animal physiology, genetics, and taxonomy. This course may offer sections of Virtual Course Offering (VCO).

Life/Physical Sci. Proficiency Development

Course No/MI ID: 03994

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: Life and Physical Sciences

CREDIT(S): 1

Life and Physical Sciences—Proficiency Development courses are designed to assist students in acquiring the skills necessary to pass proficiency examinations related to the life sciences and physical sciences.

Chemistry/VCO

Course No/MI ID: 03101

VCO: Face to Face/Blended/Virtual Course

GRADES: 10

CREDIT TYPE: Life and Physical Sciences

CREDIT(S): 1

Chemistry courses involve studying the composition, properties, and reactions of substances. These courses typically explore such concepts as the behaviors of solids, liquids, and gases; acid/base and oxidation/reduction reactions; and atomic structure. Chemical formulas and equations and nuclear reactions are also studied. This course may offer sections of Virtual Course Offering (VCO).

Biochemistry/VCO

Course No/MI ID: 03149

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: Life and Physical Sciences

CREDIT(S): 0.5

Biochemistry focuses on processes happening at a molecular level. It focuses on what's

happening inside our cells, studying components like proteins, lipids and organelles. It also looks at how cells communicate with each other, for example during growth or fighting illness. Biochemistry covers a range of scientific disciplines, including genetics, microbiology, forensics, plant science and medicine. Because of its breadth, biochemistry is very important and advances in this field of science over the past 100 years have been staggering

AP Chemistry/VCO

Course No/MI ID: 03106

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 1

The AP Chemistry course provides students with a college-level foundation to support future advanced course work in chemistry. Students cultivate their understanding of chemistry through inquiry-based investigations, as they explore topics such as: atomic structure, intermolecular forces and bonding, chemical reactions, kinetics, thermodynamics, and equilibrium. This course may offer sections of Virtual Course Offering (VCO).

Integrated Science/VCO

Course No/MI ID: 03201

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 1

The specific content of Integrated Science courses varies, but they draw upon the principles of several scientific specialties—earth science, physical science, biology, chemistry, and physics—and organize the material around thematic units. Common themes covered include systems, models, energy, patterns, change, and constancy. These courses use appropriate aspects from each specialty to investigate applications of the theme. This course may offer sections of Virtual Course Offering (VCO).

Earth and Space Science

Course No/MI ID: 03008

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Earth and Space Science courses introduce students to the study of the earth from a local and global perspective. In these courses, students typically learn about time zones, latitude and longitude, atmosphere, weather, climate, matter, and energy transfer. Advanced topics often include the study of the use of remote sensing, computer visualization, and computer modeling to enable earth scientists to understand earth as a complex and changing planet.

AP Biology/VCO

Course No/MI ID: 03056

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 1

Adhering to the curricula recommended by the College Board and designed to parallel college level introductory biology courses, AP Biology courses stress basic facts and their synthesis into major biological concepts and themes. These courses cover three general areas: molecules and cells (including biological chemistry and energy transformation); genetics and evolution; and organisms and populations (i.e., taxonomy, plants, animals, and ecology). AP Biology courses include college-level laboratory experiments. This course may offer sections of Virtual Course

Offering (VCO).

AP Environmental Science

Course No/MI ID: 03207

VCO: Face to Face/Blended/Virtual Course

Grades: 11-12

Credit Type: Sciences

Credits: 1.0

AP Environmental Science courses are designed by the College Board to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, identify and analyze environmental problems (both natural and human made), evaluate the relative risks associated with the problems, and examine alternative solutions for resolving and/or preventing them. Topics covered include science as a process, ecological processes and energy conversions, earth as an interconnected system, the impact of humans on natural systems, cultural and societal contexts of environmental problems, and the development of practices that will ensure sustainable systems.

Biology Investigations

Course No/MI ID: 53099

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

This course contains investigations for many fundamental concepts in Biology. Each investigation includes a preliminary activity, teacher information, sample researchable questions, and sample data. Labs are correlated to AP* and IB** standards. Topics covered include: Cell and Molecular Biology, Organismal Biology, Ecology, Evolution.

Conceptual Biology

Course No/MI ID: 03062

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

A survey of fundamental ideals, concepts and principles in the biological sciences designed for the non-science and pre-allied health major. The course prepares students for intelligent participation in the biological world and provides a solid scientific basis on which knowledgeable attitudes and opinions can be developed. Lecture includes characteristics of life, evolution, biomolecules, cell biology, biological organization, cellular reproduction, inheritance, biotechnology, and mechanisms of disease. Laboratory exercises emphasize the scientific method and reinforce lecture topics.

Biology IS

Course No/MI ID: 03097

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Biology Independent Study is a course that provides students with unique opportunities for independent, in-depth study of one or more specific biological problems. Students develop a familiarity with the laboratory procedures used in a given biological domain. Students enrolled in this course will complete an extended essay intended to promote high-level research and writing skills, intellectual discovery and creativity with a focus on the selected biological problem. It provides students with an opportunity to engage in personal research in a topic of their own choice, under the guidance of a supervisor (a teacher in the school). This leads to a major piece

of structured writing that will be formally presented in class at the end of the school year. It is recommended that completion of the written essay is followed by a short, concluding interview, or *viva voce*, with the supervisor.

Zoology

Course No/MI ID: 03061

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Modern Zoology is the study of all things dealing with animals. As the science has advanced over the decades, modern zoologists study more than just recognition and classification of animals; their attention now includes animal anatomy, physiology, development, histology, ecology, behavior, and evolution. The focus of this course is the recognition of key features of the major body plans that have evolved in animals and how those body plans have changed over time resulting in the diversity of animals that are evident today. Students will develop an understanding that all living things are interconnected.

Science IS

Course No/MI ID: 03997

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Science Independent Study is a course that provides students with unique opportunities for independent, in-depth study of one or more specific scientific problems. Students develop a familiarity with the laboratory procedures used in a given educational, research, or industrial setting or a variety of such settings. Students enrolled in this course will complete a science extended essay intended to promote high-level research and writing skills, intellectual discovery and creativity. It provides students with an opportunity to engage in personal research in a topic of their own choice, under the guidance of a supervisor (a teacher in the school). This leads to a major piece of structured writing that will be formally presented in class at the end of the school year. It is recommended that completion of the written essay is followed by a short, concluding interview, or *viva voce*, with the supervisor.

Physics

Course No/MI ID: 03151

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Physics courses involve the study of the forces and laws of nature affecting matter, such as equilibrium, motion, momentum, and the relationships between matter and energy. The study of physics includes examination of sound, light, and magnetic and electric phenomena.

Physical Science

Course No/MI ID: 03159

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

This is a physical science course designed to prepare students for college. The course covers

topics from Physics and Earth Science. The course is applied conceptual science with mathematical modeling, and it contains a significant laboratory component. It is intended for students who have demonstrated a willingness to commit considerable time to studying and completing assignments outside of class, and who have successfully completed a prior course in Science during high school. The course will develop the student's ability to incorporate mathematical skills in the solution of physics problems, both through the use of textbook based activities and laboratory activities. Students will be required to draw and write, and to keep a thorough and accurate ongoing physics notebook/portfolio.

Particular Topics in Biology

Course No/MI ID: 03063

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Particular Topics in Biology courses concentrate on a particular subtopic within the field of biology (such as botany, zoology, genetics, and so on) that is not otherwise described within this classification system.

Particular Topics in Chemistry

Course No/MI ID: 03108

VCO: Face to Face/Blended/Virtual Course

Grades: 11-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

This course is designed to provide a survey of inorganic and physical chemistry. Topics studied in this course include atomic structure, covalent and ionic bonding, chemical reactions, chemical calculations, acid, base and solution chemistry, radiochemistry and chemistry of hydrocarbons. Quantitative reasoning skills are developed and used where appropriate to enhance the understanding of these concepts.

Astronomy

Course No/MI ID: 03004

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Astronomy courses offer students the opportunity to study the solar system, stars, galaxies, and interstellar bodies. These courses usually introduce and use astronomic instruments and typically explore theories regarding the origin and evolution of the universe, space, and time.

Anatomy and Physiology

Course No/MI ID: 03053

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: LifeandPhysicalSciences

CREDIT(S): 0.5

Usually taken after a comprehensive initial study of biology, Anatomy and Physiology courses present the human body and biological systems in more detail. In order to understand the structure of the human body and its functions, students learn anatomical terminology, study cells and tissues, explore functional systems (skeletal, muscular, circulatory, respiratory, digestive, reproductive, nervous, and so on), and may dissect mammals.

Genetics

Course No/MI ID: 03059

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 **CREDIT TYPE: LifeandPhysicalSciences** **CREDIT(S): 0.5**

Genetics courses provide students with an understanding of general concepts concerning genes, heredity, and variation of organisms. Course topics typically include chromosomes, the structure of DNA and RNA molecules, and dominant and recessive inheritance and may also include lethal alleles, epistasis and hypostasis, and polygenic inheritance.

Technological Inquiry

Course No/MI ID: 03204

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 **CREDIT TYPE: LifeandPhysicalSciences** **CREDIT(S): 0.5**

Technological Inquiry courses provide students with an understanding of the use of process skills as an integral part of scientific activity and technological development. Students learn how scientific phenomena are explained, measured, predicted, organized, and communicated.

Science, Technology and Society

Course No/MI ID: 03210

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 **CREDIT TYPE: LifeandPhysicalSciences** **CREDIT(S): 0.5**

Science, Technology, and Society courses encourage students to explore and understand the ways in which science and technology shape culture, values, and institutions and how such factors, in turn, shape science and technology. Topics covered may include how science and technology enter society and how they change as a result of social processes.

Applied Biology/Chemistry

Course No/MI ID: 03203

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 **CREDIT TYPE: LifeandPhysicalSciences** **CREDIT(S): 0.5**

Applied Biology/Chemistry courses integrate biology and chemistry into a unified domain of study and present the resulting body of knowledge in the context of work, home, society, and the environment, emphasizing field and laboratory activities. Topics include natural resources, water, air and other gases, nutrition, disease and wellness, plant growth and reproduction, life processes, microorganisms, synthetic materials, waste and waste management, and the community of life.

Other Electives for 11-12th as outlined in the IES National Center for Education Statistics Secondary School Course Classification System SCED found online¹⁰:

Social Sciences and History Department

Per MMC Course/Credit Requirements¹¹, Social Sciences and History is the integrated study of the social sciences to prepare young people to become responsible citizens. Responsible citizens display social understanding and civic efficacy. This includes knowledge of the human condition, how it has changed over time, the variations that occur in different physical environments and

¹⁰ SCED: Secondary School Course Classification System: School Codes for the Exchange of Data:

<http://nces.ed.gov/pubs2007/2007341.pdf>

¹¹ Michigan Merit Curriculum – Social Studies http://www.michigan.gov/mde/0,1607,7-140-38924_41644_46818---00.html

cultural settings, and the emerging trends that appear likely to shape the future in an independent world. Civic efficacy is the readiness and willingness to assume responsibilities of citizenship, knowing how, when, and where to make informed and reasoned decisions for the public good in a pluralistic, democratic society.¹²

During the 2019-2020 school year, per the new State signed law House Bill 4493; Universal Learning Academy will be implementing the teachings of genocides within the social studies curriculum for grades 9 to 11 with a combined total of 6 hours of this instruction.

Our constitutional democracy requires active citizens. Responsible citizenship requires students to participate actively while learning in the classroom. Instruction should provide activities that actively engage students so that they simultaneously learn about civic participation while involved in the civic life of their communities, our state, and our nation. The social Sciences and History curriculum prepares students to participate in political activities, to serve their communities, and to regulate themselves responsibly.

The Responsible Citizen:

- 👉 Uses knowledge of the past to construct meaningful understanding of our diverse cultural heritage and inform his/her civic judgments (Historical Perspective)
- 👉 Uses knowledge of spatial patterns on earth to understand processes that shape both the natural environments and the diverse societies that inhabit them (Geographic Perspective)
- 👉 Uses knowledge of American government and politics to make decisions about governing his/her community (Civic Perspective)
- 👉 Uses knowledge of the production, distribution and consumption of goods and services to make personal, career and societal decisions about the use of scarce resources (Economic Perspective)
- 👉 Knows how, when, and where to construct and express reasoned positions on public issues (Public Discourse and Decision Making)
- 👉 Acts constructively to further the public good (Citizen Involvement)

Successful post-secondary engagement requires that students must be able to apply knowledge in new situations; to solve problems by generating new ideas; to make connections between what they read and hear in class, the world around them, and the future; and through their work, develop leadership qualities while still in high school. Therefore, educators must model for and develop in students the knowledge, skills, and dispositions that will result in responsible citizenship and successful post-secondary engagement.

Components of Social Sciences and History Proficiency include:

- 👉 Disciplinary Knowledge

¹² HSCE Social Studies http://www.michigan.gov/documents/mde/K-12_Science_Performance_Expectations_v5_496901_7.pdf

- 👉 Thinking Skills
- 👉 Democratic Values
- 👉 Citizen Participation
- 👉 Leadership Skills

Genocides within the social studies curriculum for grades 9 to 11

- 👉 What is genocide?
- 👉 Provide students with the actual list of genocides that have occurred in the 20th century
- 👉 What are some of the causes for genocide?
- 👉 Can genocide be prevented?

U.S. History and Geography Things to Remember:

- 👉 Foundational Issues in U.S. History and Geography
- 👉 The Development of an Industrial, Urban and Global United States, 1870-1930
- 👉 The Great Depression and World War II, 1920-1945
- 👉 Postwar United States, 1945-1989
- 👉 America in a New Global Age, 1989 to the present

Civics Things to Remember:

- 👉 What are civic life, politics and government?
- 👉 What are the origins and foundations of the American political system?
- 👉 How does the government established by the Constitution function to embody the purposes, values and principles of American constitutional democracy?
- 👉 What is the relationship of the United States to other nations and its role in world affairs?
- 👉 What are the roles of citizens in American society?

Economics Things to Remember:

- 👉 Understand the fundamental constraints imposed by limited resources, the resulting choices people have to make, and the trade-offs they face
- 👉 Understand how economies and markets work and how people function within them
- 👉 Understand the benefits and costs of economic interaction and interdependence among people and nations
- 👉 Develop intellectual skills of economic reasoning, problem solving, decision making and analyzing real-life situations
- 👉 Develop the ability to identify, analyze, and evaluate the consequences of individual decisions and public policy
- 👉 Study the Market Economy, National Economy, International Economy and Personal Finance

Michigan Social Studies C3 Update A Plan for Adoption and Implementation

Michigan's current K-12 Social Studies Standards were written in 2006 to provide guidance for our state's K-12 social studies education as described by the Michigan Merit Curriculum. The C3 Framework, which promotes career, college, and civic readiness, and specifically addresses geography, history, economics, and civics, was released in 2013. Michigan was a lead developer in this framework, which guides states in updating content standards in these topics.

Student Proficiency in Social Studies

Michigan students continue to struggle in social studies, and lag behind many states in student achievement in this topic, with less than half of our students being proficient in social studies. There are a variety of possible reasons for this, including poor preparation of educators, the lack of appropriate resources and time for instruction, a lack of focus on higher-order thinking skills, and an overly complex set of standards.

As a result of this and other feedback from educators, Michigan's social studies communities came together this past year to update the standards, with the mantra of "fewer, clearer, higher." The goal was to reduce and clarify the standards and introduce a framework for inquiry and questioning that focuses on higher order thinking skills. The group also focused on incorporating civil rights considerations and perspectives, and aligning the standards to the C3 Framework.

The Arc of Inquiry

The organizing structure for the social studies framework, the "Arc of Inquiry," guides the instructional process, and is at the heart of the learning experience. It involves:

- Developing Questions and Planning Inquiries
- Applying Disciplinary Concepts and Tools
- Evaluating Sources and Using Evidence
- Communicating Conclusions and Taking Informed Action

This organizer supports social studies instruction at all levels, whether students are exploring questions around 21st century global economies or participating in an archeological "dig" (at right) to discover how people lived in Michigan over 700 years ago.

The State Board of Education is beginning to review the new standards now, and will be considering adoption later this year. For more information about this update, contact Gregg Dionne (dionneg@michigan.gov).

Courses in social studies can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

U.S History-Comprehensive/VCO

Course No/MI ID: 04101

VCO: Face to Face/Blended/Virtual Course

GRADES: 9

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 1

U.S. History-Comprehensive course provide students with an overview of the history of the United States, examining time periods from discovery or colonialism through World War II or after. These courses typically include a historical overview of political, military, scientific, and social developments. Course content may include a history of the North American peoples before European settlement. This course may offer sections of Virtual Course Offering (VCO).

Civics

Course No/MI ID: 04161

VCO: Face to Face/Blended/Virtual Course

GRADES: 10

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Civics courses examine the general structure and functions of American systems of government, the roles and responsibilities of citizens to participate in the political process, and the relationship of the individual to the law and legal system. These courses do not typically delve into the same degree of detail on constitutional principles or the role of political parties and interest groups as do comprehensive courses in U.S. Government.

Economics

Course No/MI ID: 04201

VCO: Face to Face/Blended/Virtual Course

GRADES: 10

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Economics courses provide students with an overview of economics with primary emphasis on the principles of microeconomics and the U.S. economic system. These courses may also cover topics such as principles of macroeconomics, international economics, and comparative economics. Economic principles may be presented in formal theoretical contexts, applied contexts, or both.

World History & Geography

Course No/MI ID: 04051

VCO: Face to Face/Blended/Virtual Course

GRADES: 10

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

In addition to covering the objectives of World History—Overview courses, World History and Geography courses provide an overview of world geography. These courses are often developed in response to increased national concern regarding the importance of geography, and they explore geographical concepts.

Global Geography

Course No/MI ID: 04049

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

This course will examine the world around us. Students will learn and explain how we as people live and learn from it, what condition it's in and what impact we can and could have on the environment.

Anthropology

Course No/MI ID: 04251

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Anthropology courses introduce students to the study of human evolution with regard to the origin, distribution, physical attributes, environment, and culture of human beings. These courses provide an overview of anthropology, including but not limited to both physical and cultural anthropology. This course may offer sections of Virtual Course Offering (VCO).

World Area Studies

Course No/MI ID: 04061

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

World Area Studies courses examine the history, politics, economics, society, and/or culture of one or more regions of the world, such as Africa, Latin America, the former Soviet Union, Far East Asia, and the Middle East. These courses may focus primarily on the history of a particular region or may take an interdisciplinary approach to the contemporary issues affecting the region. Furthermore, these courses may emphasize one particular country (other than the United States), rather than emphasizing a region or continent.

Contemporary World Issues

Course No/MI ID: 04064

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Contemporary World Issues courses enable students to study political, economic, and social issues facing the world. These courses may focus on current issues, examine selected issues throughout the 20th century, and look at historical causes or possible solutions.

European History

Course No/MI ID: 03207

VCO: Face to Face/Blended/Virtual Course

Grades: 11-12

Credit Type: Sciences

Credits: 1.0

Medieval European History courses provide a survey of European civilization from the fall of Rome through the late Middle Ages. The course also gets into modern European history and examines a small component of the development of political, social, and economic movements in Europe over the past few centuries (from the Renaissance period, or later, to the contemporary period) and usually include such topics as the rise of the modern nation state, scientific and industrial revolutions, the age of exploration and nationalism, imperialism, and world war.

AP World History

Course No/MI ID: 04057

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Following the College Board's suggested curriculum designed to parallel college-level World History courses, AP World History courses examine world history from 8000 BCE to the present with the aim of helping students develop a greater understanding of the evolution of global processes and contracts and how different human societies have interacted. These courses

highlight the nature of changes in an international context and explore their causes and continuity.

AP U.S. History

Course No/MI ID: 04104

VCO: Face to Face/Blended/Virtual Course

Grades: 11-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 1

AP United States History focuses on developing students' abilities to think conceptually about U.S. history from approximately 1491 to the present and apply historical thinking skills as they learn about the past. Seven themes of equal importance — identity; peopling; politics and power; work, exchange, and technology; America in the world; environment and geography; and ideas, beliefs, and culture — provide areas of historical inquiry for investigation throughout the course. These require students to reason historically about continuity and change over time and make comparisons among various historical developments in different times and places.

AP Psychology

Course No/MI ID: 04256

VCO: Face to Face/Blended/Virtual Course

Grades: 10-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 1.0

Following the College Board's suggested curriculum designed to parallel a college-level psychology course, AP Psychology courses introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals, expose students to each major subfield within psychology, and enable students to examine the methods that psychologists use in their science and practice.

Contemporary U.S. Issues

Course No/MI ID: 04106

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Contemporary U.S. Issues courses study the political, economic, and social issues facing the United States, with or without an emphasis on state and local issues. These courses may focus on current issues or may examine selected issues that span throughout the 20th century to the present.

Political Science

Course No/MI ID: 04153

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Political Science courses approach the study of politics from a theoretical perspective, including an examination of the role of government and the nature of political behavior, political power, and political action.

Comparative Government

Course No/MI ID: 04154

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

Comparative Government courses study the basic tenets of government, searching for the differences and similarities among several forms of government. These courses take a

comparative approach to the study of government and politics, focusing on how the United States compares with other nations.

Legal System

Course No/MI ID: 04165

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: SocialSciencesandHistory CREDIT(S): 0.5

Legal System courses examine the workings of the U.S. criminal and civil justice systems, including providing an understanding of civil and criminal law and the legal process, the structure and procedures of courts, and the role of various legal or judicial agencies. Although these courses emphasize the legal process, they may also cover the history and foundation of U.S. law (the Constitution, statutes, and precedents). Course content may also include contemporary problems in the criminal justice system.

History – IS

Course No/MI ID: 04147

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: SocialSciencesandHistory CREDIT(S): 0.5

This course will be inquiry-based, with students conducting research and investigating issues and topics that relate to our modern world. Students will also practice real-life 21st Century skills such as collaboration, verbal and written communication and creativity. Students will compose an extended essay on a historical topic of their choosing. They will be guided through the research and writing process, building their work throughout the school year. The culmination of this work will be a capstone essay and presentation to peers.

Law Studies

Course No/MI ID: 04162

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12 CREDIT TYPE: SocialSciencesandHistory CREDIT(S): 0.5

This course allows students to examine and study the development, structure and nature of the American legal system, and will also examine various current and major legal issues within the American legal system. Included in this effort will be extensive study and examination of the Constitution of the United States and its continuous interpretation. This course will also allow students to compare varying forms of legal systems on a global scale. Emphasis will be placed on the interaction between the American political and legal systems. The course will most likely cover the following topics: foundations of American law, trial procedures/mock trial, case studies.

Social Science – IS

Course No/MI ID: 04260

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12 CREDIT TYPE: SocialSciencesandHistory CREDIT(S): 0.5

Social Science – Independent Studies (IS) allows students to compose an extended essay on a social science topic of their choosing. Students will be guided through the research and writing process, building their work throughout the school year. The culmination of this work will be a capstone essay and presentation to peers. The teacher will guide students through the following processes: selecting a topic, creating a thesis, gathering resources, citing resources,

drafting/outlining, compiling information/writing skills, revising/peer editing, presentation of topic.

US and World Affairs

Course No/MI ID: 04156

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: SocialSciencesandHistory

CREDIT(S): 0.5

This course will address issues affecting our lives as Americans and global citizens in our modern world - primarily based on major events and trends occurring and unfolding during the length of the school year. The course will generally cover the following topics: historical roots of modern international relations and diplomacy, current economic trends, international relations, current conflicts, and other events that will arise during the length of the course.

Other Electives for 11-12th as outlined in the IES National Center for Education Statistics Secondary School Course Classification System SCED found online¹³:

Foreign Language and Literature Department¹⁴

Michigan students, like students throughout the United States, are living in and contributing to an increasingly diverse society and interdependent community of nations in the 21st century. To realize their personal, social and long-term career goals, individuals need to be able to communicate with others skillfully, appropriately, and effectively. The challenge of contemporary education is to prepare all students for life in this new world. Because language and communication are at the heart of the human experience, the United States must equip students linguistically and culturally to communicate successfully in a pluralistic American society and abroad. This imperative addition to our students' learning experience envisions a future in which all students develop and maintain proficiency in English and in at least one other language. Michigan has setup its standards to cover five major areas of learning:

- ✦ Communication – communicate in languages other than English
- ✦ Cultures – gain knowledge and understanding of other cultures
- ✦ Connections – connect with other disciplines and acquire information
- ✦ Comparisons – develop insight into the nature of language and culture
- ✦ Communities – participate in multilingual communities at home and around the world

¹³ SCED: Secondary School Course Classification System: School Codes for the Exchange of Data:

<http://nces.ed.gov/pubs2007/2007341.pdf>

○ http://www.michigan.gov/documents/mde/K-12_MI_Math_Standards_REV_470033_7_550413_7.pdf

The proficiency guidelines of the American Council on the Teaching of Foreign Languages (ACTFL) describe language proficiency in terms of five levels: Novice, Intermediate, Advanced, Superior and Distinguished. At the Novice, Intermediate, and Advanced levels, proficiency is further defined as low, mid, or high. MMC requirements expect students to reach proficiency of Novice High Level which typically requires more than two credits of study. This is why we offer Arabic language for students from Kindergarten through 12th grade as students will need the opportunity to attain high levels of proficiency for meeting MMC and IB MYP program requirements. This will also set students up to be able to demonstrate proficiency and earn High School credit through K-8th experiences effective for the class of 2020 as studies show you can reach the level of Novice mid by studying in grades K-4. Students are also offered the opportunity to study French or other languages through electives upon completion of their Arabic Language requirements.

Our Foreign Language and Literature courses are setup so that students' progress from one level to another and are able to enroll in higher levels at a grade level based on their proficiency. Courses are scheduled at the school level based on need and levels of experience of students and classes. While credit requirements are at 2.00 credits, some students may need additional credit to meet the requirement of attaining mastery at the Novice High Level.

Students may fulfill the language requirements for Arabic by demonstrating proficiency at the Novice High level in speaking and writing (productive skills) and in listening and reading (interpretive skills) based on years of experience per Principal and Assistant Superintendent approval.

The assessment process can be a powerful tool when students are actively involved in the process. Involvement allows students to take ownership of their learning and builds confidence in their ability over time. Reliable formative and summative assessments provide teachers with information they need to make informed instructional decisions and be more responsive to students' needs. Both assessment of learning and assessment for learning are essential and share common elements. World languages assessments will:

- ☞ Align with learning goals and instruction;
- ☞ Incorporate performance-based assessments that have application beyond the classroom;
- ☞ Vary in type and format;
- ☞ Use criteria scoring tools such as rubrics or exemplars;
- ☞ Demonstrate the acquisition of important language skills and cultural knowledge;
- ☞ Cause students to use critical thinking skills;
- ☞ Meet the needs of diverse learners;
- ☞ Provide opportunities for students to reflect on their own learning and progress through timely feedback.

Courses in foreign language can be given face to face (in person/classroom), blended learning,

and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to traditional academic instruction.

MICHIGAN SEAL OF BILITERACY

- The **Michigan Seal of Biliteracy** has been created to recognize high school graduates who exhibit language proficiency in English and at least one additional world language. The **Seal** will provide employers with a way to identify individuals with strong language and biliteracy skills. The Seal may be awarded to any student receiving a high school diploma, a high school certificate of completion or a high school equivalency certificate AND who has demonstrated Intermediate High proficiency on acceptable world language assessments and met the English Language Arts requirements for graduation.
- The Seal was created to encourage students to learn world languages and/or maintain their native and heritage languages. It also provides employers with a way to identify individuals with strong language and biliteracy skills, and serves as an additional tool for colleges and universities to recognize applicants' language abilities for admission and placement.

Official Seal resources can be obtained at the [Michigan Department of Education \(MDE\) Seal of Biliteracy website](#).

Arabic I/VCO

Course No/MI ID: 06721

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: Foreign Language and Literature

CREDIT(S): 1

The courses introduce and then extend students' skills in speaking, reading, writing, and comprehending the Arabic language and students' knowledge of Arabic-speaking cultures. Initial courses emphasize grammar and syntax, vocabulary, and vocal tones so that students have an understanding of the language and its rules. The course will focus on the Arabic spoken and written language by having students involved in discussions about different topics, sharing information, written composition skills, grammar and reading comprehension skills. This course may offer sections of Virtual Course Offering (VCO).

Arabic II/VCO

Course No/MI ID: 06722

VCO: Face to Face/Blended/Virtual Course

GRADES: 10-12

CREDIT TYPE: Foreign Language and Literature

CREDIT(S): 1

This course will focus on the Arabic spoken and written language by having students involved in discussions about different topics, sharing information, written composition skills, grammar and reading comprehension skills. Arabic courses introduce and then extend students' skills in speaking, reading, writing, and comprehending the Arabic language and students' knowledge of Arabic-speaking cultures. The courses advance students' knowledge and ability to express

themselves beyond basic communication (and to understand others, either in a written or verbal format), seeking to enable students to express more complex concepts, in different tenses, and to do so more easily. This course may offer sections of Virtual Course Offering (VCO).

Arabic III/VCO

Course No/MI ID: 06723

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12 CREDIT TYPE: ForeignLanguageandLiterature CREDIT(S): 1.0

Students continue to develop their reading, writing, speaking, and listening skills in Arabic, expand their vocabulary, and deepen their knowledge of pronunciation and grammatical principles in order to comprehend and express essential ideas in both spoken and written Arabic. This course may offer sections of Virtual Course Offering (VCO).

Arabic IV/VCO

Course No/MI ID: 06724

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12 CREDIT TYPE: ForeignLanguageandLiterature CREDIT(S): 1.0

Students continue to develop their reading, writing, speaking, and listening skills in Arabic, expand their vocabulary, and deepen their knowledge of pronunciation and grammatical principles in order to comprehend and express essential ideas in both spoken and written Arabic. This course may offer sections of Virtual Course Offering (VCO).

Arabic Conversation & Culture/VCO

Course No/MI ID: 06728

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12 CREDIT TYPE: ForeignLanguageandLiterature CREDIT(S): 1.0

Arabic Conversation and Culture courses provide students with an introduction to the Arabic language and the culture(s) of Arabic-speaking people, placing greater emphasis on speaking and listening skills while de-emphasizing writing and reading the language. This course may offer sections of Virtual Course Offering (VCO).

Academic Enrichment, Tutorial, and Miscellaneous Courses

Academic Enrichment courses are based on student individual targeted needs and are focused on remediation. These courses are also supplemental courses to provide make-up credit for areas where students need additional time to master curriculum content expectations. Courses are available for 9th–12th grade students for core subjects and are scheduled in place of electives as needed and determined by school counselor(s) and/or principal. Students are also scheduled for caseload roster sections to allow tutorial staff to track progress in supplemental services provided for our *before, during, and after school* tutorial programs.

Courses in academic enrichment, tutorial and miscellaneous courses can be given face to face (in person/classroom), blended learning, and or virtual learning platforms. These three options are dependent upon the need of the community and with local ISD and State approval.

Virtual Course Offering (VCO) could be 50/50 blended or virtual learning course where students receive academic instruction online through a computer over the internet in addition to

traditional academic instruction.

**Introduction to Business
12051**

Course No/MI ID:

VCO: Face to Face/Blended/Virtual Course

Grades: 9-12

Credit Type: Mathematics

Credits: 0.5

Introductory Business courses survey an array of topics and concepts related to the field of business. These courses introduce business concepts such as banking and finance, the role of government in business, consumerism, credit, investment, and management. They usually provide a brief overview of the American economic system and corporate organization. Introductory Business courses may also expose students to the varied opportunities in secretarial, accounting, management, and related fields. This course may offer sections of Virtual Course Offering (VCO).

Marketing Education

Course No/MI ID: 12199

VCO: Face to Face/Blended/Virtual Course

Grades: 9-12

Credit Type: Mathematics

Credits: 0.5

Principles of Marketing courses offer students insight into the processes affecting the flow of goods and services from the producer to the consumer. Course content ranges considerably as general marketing principles such as purchasing, distribution, and sales are covered; however, a major emphasis is often placed on kinds of markets; market identification; product planning, packaging, and pricing; and business management. This course may offer sections of Virtual Course Offering (VCO).

Particular Topics in Recreation, Amusement, and Attractions

Course No/MI ID: 16203

VCO: Face to Face/Blended/Virtual Course

GRADES: 11-12

CREDIT TYPE: AcademicEnrichment

CREDIT(S): 0.5

These courses examine specific topics in recreation, amusement, and attractions such as local opportunities rather than provide a general study of the industry. This course may offer sections of Virtual Course Offering (VCO).

Tutorial – Checklist

Course No/MI ID: 72999c

VCO: Face to Face/Blended/Virtual Course

GRADES: 9-12

CREDIT TYPE: AcademicEnrichment

CREDIT(S): 0

Miscellaneous - Checklists Courses allow teachers to communicate electronically with parents and students on their approaches to learning skills related to student learning and submission of required forms and checklist items.

Work-Based Learning Program Teacher Recommendation

The Work-Based Learning Program is a school-to-work program offering work-based courses on and or off the premises of the Academy. The Program matches a student’s class work and career interests and offers work-site based learning opportunities. The Work-Based Learning Program is not a job placement service; it is an enrollment program, which enables students to receive career exploration, training and supervised work experience, while also continuing their academic studies.

The Work-Based Program is a full-year program designed primarily for high school juniors/seniors. Either one-half or one credit per year is granted for Work-Based depending upon the number of courses a student is enrolled in. Placement will be determined based on the student’s Career Pathway as identified in his/her E.D.P. (Educational Development Plan).

The student’s job duties are outlined in advance and performance and progress on his/her job will be supervised by the school designated certified teacher. Work Based students are approved to work between 5-10 hours per week, with a minimum requirement of 5 hours per week. Should a student’s school work or performance on the job become unsatisfactory, removal from the Work Based program could result. The student’s first obligation is to his/her school work.

Student Information

I, _____ in _____ grade would like to enroll in the Work-Based
(Student Name) (Grade)

Learning Program at Star International Academy for the 2022-2023 school year.
